| Attachment I: Notice To Commercial Net Fishermen, 1993 Skeena River Steelhead Catch And Release Program | 160 |
| 14. Overwintering Conditions | 167 |

READ CAREFULLY

1. Reporting of all catches to the Dept of Fisheries and Oceans is the responsibility of the fisherman and a condition of licence renewal.
 2. Accurate catch reports must include the map number or numbers showing the areas in which your fish were caught.
 3. The statistical areas shown on this map are to be used as a guide only. For more exact information refer to the Pacific Fishery Management Area Regulations.

Statistical areas are divided by red lines

Note. All scores revised February 1985.

STATISTICAL AREA MAP

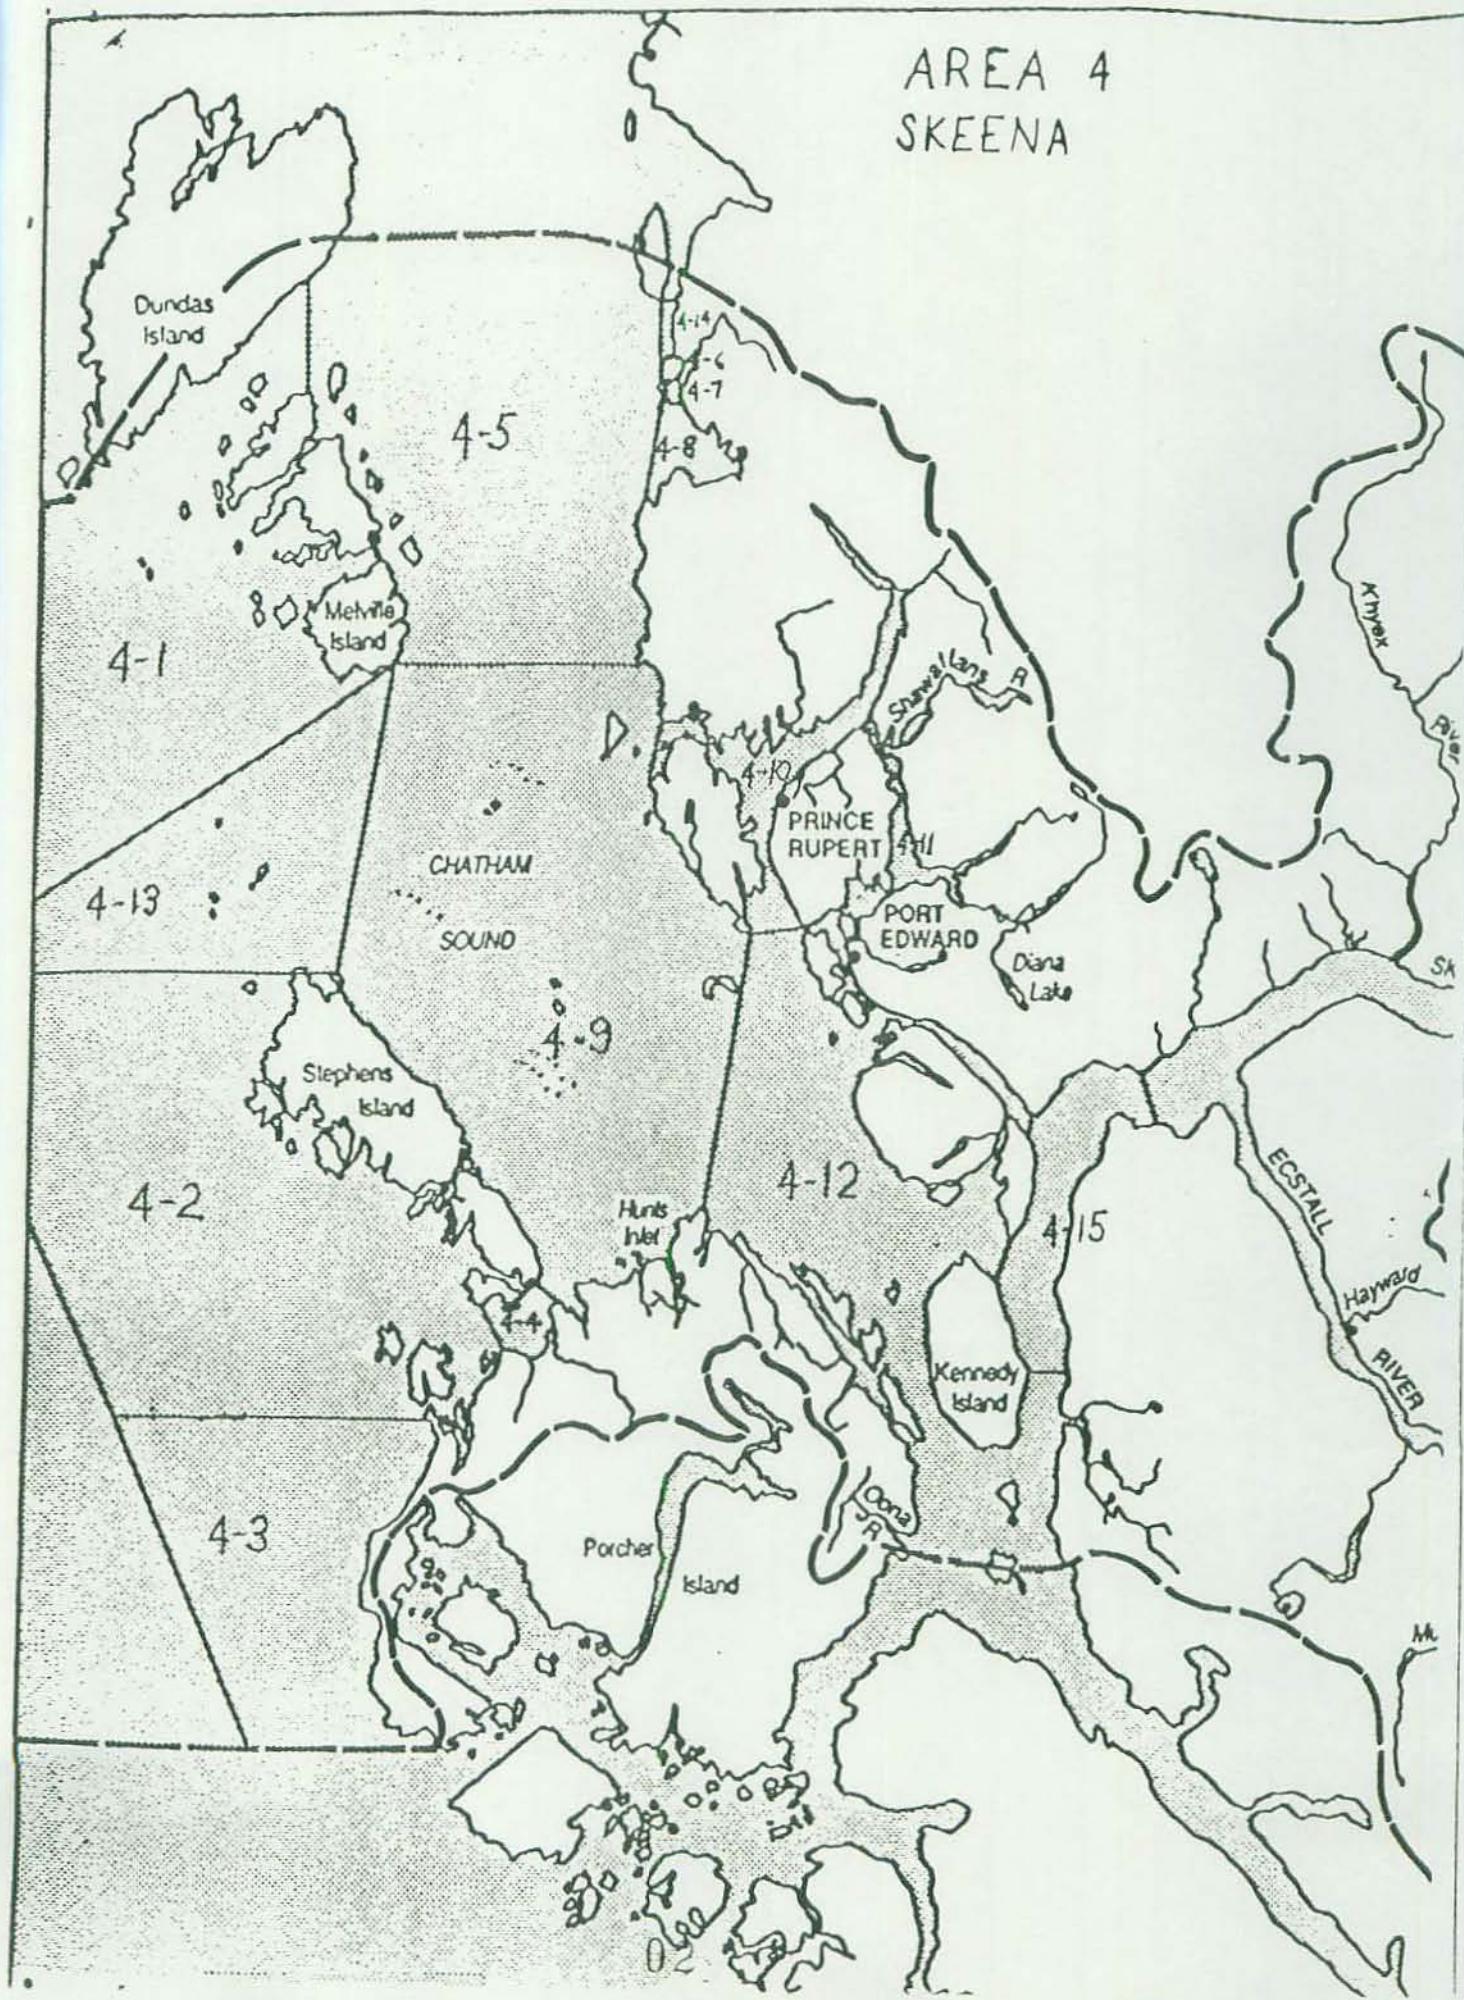

SHOWING AREAS OF CATCH FOR
BRITISH COLUMBIA WATERS
NORTHERN HALF

A scale bar with two horizontal lines. The top line is labeled "KILOMETRES" and has tick marks at 0, 10, 20, 30, 40, and 50. The bottom line is labeled "NAUTICAL MILES" and has tick marks at 0, 5, 10, 20, and 30.

SIXTH EDITION FEB 1985

AREA 4
SKEENA

4 (a) Area 4

Comprising those waters bounded inside a line commencing at the southern most point of Dundas Island, thence true west to Prince Leboo Island, thence southerly along the shoreline to the southern most point, thence true west to the surfline, thence southerly following the surfline to a point true west of Cape George on Porcher Island, thence true east to Cape George, thence following the western, northern then eastern shoreline to Peninsula Point, thence to the northern most point of Gibson Island, thence to Buckley Point on the mainland, thence following the shoreline northerly to a marker approximately one and one half miles easterly of Vietch Point, thence across the Skeena River to a marker near Mowitch Point, thence north westerly along the shoreline to Redcliffe Point, thence to Duncan Point on Finlayson Island, thence northerly along the shoreline to Gordon Point, thence to Green Island Light, thence magnetic west to a marker on the easterly shore of Dundas Island, thence southerly along the shoreline to the point of commencement.

(b) Area 4 is composed of Subareas as follows:

Subarea 4-1

Those waters of Hudson Bay Passage, Brown Passage, and adjacent waters inside a line from the southern most point of Dundas Island true west to Prince Leboo Island, thence southerly along the shoreline to the southern most point of Prince Leboo Island, thence true west to the surfline, thence southerly along the surfline to Butterworth Rocks light, thence in a straight line to Triple Islands light, thence to Deans Point on Melville Island, thence northerly along the shoreline to the northeastern most point of Melville Island, thence to the southeastern most point of Dunira Island, thence northerly along the eastern shoreline to the northern most point of Dunira Island, thence true west to Baron Island, thence northerly along the shoreline to the northern most point of Baron Island, thence true north to Dundas Island; thence southwesterly along the shoreline to the point of commencement.

Subarea 4-2

Those waters of Hecate Strait, Edye Passage and adjacent waters inside a line from Butterworth Rocks light, thence southerly along the surfline to a point true west of Seal Rocks light, thence true east to Seal Rocks light, thence to Welcome Point on Porcher Island, thence northerly along the shoreline to Edwin Point, thence to View Point on Arthur Island, thence easterly along the shoreline to the easternmost point of Arthur Island, thence to Morrell Point on Prescott Island, thence northerly along the shoreline to a marker at Stephens Passage, thence across the passage to a marker on Stephens Island, thence northerly along the shoreline to Riel Point, thence to the easternmost point of Avery Island, thence northerly along the shoreline to the northwesternmost point, thence to Harris Rock, thence to the point of commencement.

(a)

4 a) Secteur 4

Ce secteur comprend les eaux qui s'étendent en deçà d'une ligne tirée à partir de l'extrémité sud de l'île Dundas; de là, vers l'ouest vrai, jusqu'à l'île Prince Leboo; de là, vers l'ouest vrai, jusqu'à la ligne de démarcation, de là, vers le sud et le long de la ligne de démarcation, jusqu'à un point situé à l'ouest vrai du cap George, sur l'île Porcher; de là, vers l'est vrai, jusqu'au cap George; de là, le long des rivages ouest, nord, puis est, jusqu'à la pointe Peninsula; de là, jusqu'à l'extrémité nord de l'île Gibson; de là, jusqu'à la pointe Buckley, sur le continent; de là, le long du rivage et vers le nord, jusqu'à une balise située à environ un mille et demi à l'est de la pointe Vietch; de là, vers l'autre côté de la rivière Skeena, jusqu'à une balise située près de la pointe Mowitch; de là, vers le nord-ouest et le long du rivage, jusqu'à la pointe Redcliffe; de là, jusqu'à la pointe Duncan, sur l'île Finlayson, de là, vers le nord et le long du rivage, jusqu'à la pointe Gordon; de là, jusqu'au feu de l'île Green; de là, vers l'ouest magnétique, jusqu'à une balise située sur la rive est de l'île Dundas; et de là, vers le sud et le long du rivage, jusqu'au point d'origine.

b) Le secteur 4 est composé des sous-secteurs suivants:

Sous-secteur 4-1

Les eaux du passage de la baie Hudson et du passage Brown, ainsi que les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de l'extrémité sud de l'île Dundas, vers l'ouest vrai, jusqu'à l'île Prince Leboo; de là, vers le sud et le long du rivage, jusqu'à l'extrémité sud de l'île Prince Leboo; de là, vers l'ouest vrai, jusqu'à la ligne de démarcation; de là, vers le sud et le long du rivage, jusqu'au feu des rochers Butterworth; de là, en droite ligne, jusqu'au feu des îles Triple; de là, jusqu'à la pointe Deans, sur l'île Melville; de là, vers le nord et le long du rivage, jusqu'à l'extrémité nord-est de l'île Melville; de là, vers l'extrémité sud-est de l'île Dunira; de là, vers le nord et le long du rivage est, jusqu'à l'extrémité nord de l'île Dunira; de là, vers l'ouest vrai, jusqu'à l'île Baron; de là, vers le nord et le long du rivage jusqu'à l'extrémité nord de l'île Baron; de là, vers le nord vrai, jusqu'à l'île Dundas; et de là, vers le sud-ouest et le long du rivage, jusqu'au point d'origine.

Sous-secteur 4-2

Les eaux du Détroit Hecate, et de la passe Edye, ainsi que les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir du feu des rochers Butterworth; de là, vers le sud et le long de la ligne de démarcation, jusqu'à un point situé à l'ouest vrai du feu des rochers Seal; de là, vers l'est vrai, jusqu'au feu des rochers Seal; de là, jusqu'à la pointe Welcome, sur l'île Porcher; de là, vers le nord et le long du rivage, jusqu'à la pointe Edwin; de là, jusqu'à la pointe View, sur l'île Arthur; de là, vers l'est et le long du rivage, jusqu'à l'extrémité est de l'île Arthur; de là, jusqu'à la pointe Morrell, sur l'île Prescott; de là, vers le nord et le long du rivage, jusqu'à une balise située au passage Stephens; de là, à travers le passage jusqu'à une balise située sur l'île Stephens; de là, vers le nord et le long du rivage jusqu'à la pointe Riel; de là, jusqu'à l'extrémité est de l'île Avery; de là, vers le nord et le long du rivage, jusqu'à l'extrémité nord-ouest; de là, jusqu'au rocher Harris, et de là, jusqu'au point d'origine.

(a) P.C. 1985-74

Amendment List February 27, 1985

a) C.P. 1985-74

Liste de modifications 27 février 1985

Subarea 4-3

Those waters of Hecate Strait and adjacent waters inside a line from Welcome Point on Porcher Island to Seal Rocks light, thence true west to the surfline, thence southerly along the surfline to a point true west of Cape George on Porcher Island, thence true east to Cape George, thence along the shoreline to the point of commencement.

Subarea 4-4

Those waters of Edye Pass and adjacent waters inside a line from Pearce Point on Porcher Island to Morrell Point on Prescott Island, thence to the eastern most point of Arthur Island, thence westerly along the shoreline to View Point, thence to Edwin Point on Porcher Island.

Subarea 4-5

Those waters of Chatham Sound and adjacent waters inside a line from Ryan Point on the mainland to Deans Point on Melville Island, thence northerly along the shoreline to the northeasternmost point, thence to the southeasternmost point of Dunira Island, thence northerly along the eastern shoreline to the northernmost point, thence true west to Baron Island, thence northerly along the easterly shoreline to the northernmost point, thence true north to Dundas Island, thence northeasterly along the shoreline to a marker true west of the light on Green Island, thence to the light on Green Island, thence to Gordon Point on Finlayson Island, thence along the westerly shoreline to a marker on Fortune Point, thence to the northernmost point of Mist Island, thence following the easterly shoreline to the southernmost point, thence to the northernmost point of Burnt Cliff Island, thence easterly and southerly along the shoreline to the southernmost point, thence to the northernmost point of South Island, thence along the easterly shoreline to the southernmost point, thence to Trenham Point on Tsimpsean Peninsula, thence to the point of commencement.

Subarea 4-6

Those waters of Pearl Harbour and adjacent waters inside a line from Pearl Point on Tsimpsean Peninsula to Cultivation Point on Burnt Cliff Island, thence westerly along the shoreline to the northernmost point, thence to the southernmost point of Mist Island, thence following the easterly shoreline to the northernmost point, thence to the westernmost Island of Flat Top Islands, thence to the easternmost point of Green Mound, thence true east to a marker on Tsimpsean Peninsula.

Sous-secteur 4-3

Les eaux du détroit d'Hecate et les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de la pointe Welcome, sur l'île Porcher, jusqu'au feu des rochers Seal; de là, vers l'ouest vrai, jusqu'à la ligne de démarcation; de là, vers le sud et le long de la ligne de démarcation, jusqu'à un point situé à l'ouest vrai du cap George, sur l'île Porcher; de là, vers l'est vrai, jusqu'au cap George; et de là, le long du rivage, jusqu'au point d'origine.

Sous-secteur 4-4

Les eaux de la passe Edye et les eaux adjacentes qui s'étendent en deçà d'une ligne tracée à partir de la pointe Pearce, sur l'île Porcher, jusqu'à la pointe Morrell, sur l'île Prescott; de là, jusqu'à l'extrémité est de l'île Arthur; de là, vers l'ouest et le long du rivage, jusqu'à la pointe View; et de là, jusqu'à la pointe Edwin, sur l'île Porcher.

Sous-secteur 4-5

Les eaux du goulet Chatham et les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de la pointe Ryan, sur le continent, jusqu'à la pointe Deans, sur l'île Melville; de là, vers le nord et le long de la rive, jusqu'à l'extrémité nord; de là, jusqu'à l'extrémité sud-est de l'île Dunira; de là, vers le nord et le long de la rive est, jusqu'à l'extrémité nord; de là, vers l'ouest vrai, jusqu'à l'île Baron; de là, vers le nord et le long de la rive est, jusqu'à l'extrémité nord; de là, vers le nord vrai, jusqu'à l'île Dundas; de là, vers le nord-est et le long de la rive, jusqu'à une balise située à l'ouest vrai du feu de l'île Green; de là, jusqu'au feu de l'île Green; de là, jusqu'à la pointe Gordon, sur l'île Finlayson; de là, le long de la rive ouest, jusqu'à une balise située sur la pointe Fortune; de là, jusqu'à l'extrémité nord de l'île Mist; de là, le long de la rive est, jusqu'à l'extrémité sud; de là, jusqu'à l'extrémité nord de l'île Burnt Cliff; de là, vers l'est et le sud et le long de la rive, jusqu'à l'extrémité sud; de là, jusqu'à l'extrémité nord de l'île South; de là, le long de la rive est, jusqu'à l'extrémité sud; de là, jusqu'à la pointe Trenham, sur la péninsule Tsimpsean; et de là, jusqu'au point d'origine.

Sous-secteur 4-6

Les eaux du havre Pearl et les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de la pointe Pearl, sur la péninsule Tsimpsean, jusqu'à la pointe Cultivation, sur l'île Burnt Cliff; de là, vers l'ouest et le long de la rive, jusqu'à l'extrémité nord; de là, jusqu'à l'extrémité sud de l'île Mist; de là, le long de la rive est, jusqu'à l'extrémité nord; de là, jusqu'à l'île située le plus à l'ouest des îles Flat Top; de là, jusqu'à l'extrémité est du tertre Green; et de là, vers l'est vrai, jusqu'à une balise située sur la péninsule Tsimpsean.

(a)

a)

Subarea 4-7

Those waters of Big Bay and adjacent waters inside a line from Pearl Point on Tsimpsean Peninsula to Cultivation Point on Burnt Cliff Island, thence along the easterly shoreline to the southern most point of Burnt Cliff Island, thence to the northern most point of South Island, thence along the easterly shoreline to the southern most point of South Island, thence to the southern most point of Haycock Island, thence to Whitecliff Island, thence to Shattock Point on Tsimpsean Peninsula.

Subarea 4-8

Those waters of Big Bay and adjacent waters inside a line from Trenham Point on Tsimpsean Peninsula to the southern most point of South Island, thence to the southern most point of Haycock Island, thence in a straight line to Whitecliff Island, thence to Shattock Point on Tsimpsean Peninsula.

Subarea 4-9

Those waters of Chatham Sound and adjacent waters inside a line from Deans Point on Melville Island east to Ryan Point on the mainland, thence southerly along the shoreline to Observation Point, thence to Straith Point on Digby Island, thence along the westerly shoreline to Lima Point, thence to Hunt Point on Porcher Island, thence westerly along the shoreline to Pearce Point, thence to Morrell Point on Prescott Island, thence along the easterly shoreline to a marker at Stephens Passage, thence to a marker on Stephens Island opposite, thence northerly along the shoreline to Riel Point, thence to the eastern most point of Avery Island, thence northerly along the shoreline to the northwestern most point of Avery Island, thence to Harris Rock, thence to Deans Point on Melville Island.

Subarea 4-10

Those waters of Prince Rupert Harbour and adjacent waters bounded on the west by a line from Straith Point on Digby Island to Observation Point on the mainland and bounded on the south by a line from Lima Point on Digby Island to the southern most point of Kaien Island, thence along the northwesterly shoreline to Ritchie Point, thence to Pethick Point on Tsimpsean Peninsula.

Subarea 4-11

Those waters of Porpoise Harbour, Wainwright Basin, Morse Bay, and adjacent waters inside a line from the southern most point of Kaien Island to the northwestern most point of Ridley Island, thence southerly along the eastern shoreline to the southern most point of Ridley Island, thence to the western most point of Lelu Island, thence northerly along the shoreline to the northern most point of Lelu Island, thence to a marker on the shore of Tsimpsean Peninsula opposite; and bounded on the north by a line from Pethick Point to Richie Point on Kaien Island.

Sous-secteur 4-7

Les eaux de la baie Big et les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de la pointe Pearl, sur la péninsule Tsimpsean, jusqu'à la pointe Cultivation, sur l'île Burnt Cliff; de là, le long du rivage est, jusqu'à l'extrémité sud de l'île Burnt Cliff; de là, jusqu'à l'extrémité nord de l'île South; de là, le long du rivage est, jusqu'à l'extrémité sud de l'île South; de là, jusqu'à l'extrémité sud de l'île Haycock; de là, jusqu'à l'île Whitecliff; et de là, jusqu'à la pointe Shattock, sur la péninsule Tsimpsean.

Sous-secteur 4-8

Les eaux de la baie Big et les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de la pointe Trenham, sur la péninsule Tsimpsean, jusqu'à l'extrémité sud de l'île South; de là, jusqu'à l'extrémité sud de l'île Haycock; de là, en droite ligne jusqu'à l'île Whitecliff; et de là, jusqu'à la pointe Shattock, sur la péninsule Tsimpsean.

Sous-secteur 4-9

Les eaux du goulet Chatham et les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de la pointe Deans, sur l'île Melville, à l'est de la pointe Ryan, sur le continent; de là, vers le sud et le long du rivage, jusqu'à la pointe Observation; de là, jusqu'à la pointe Straith, sur l'île Digby; de là, le long du rivage ouest, jusqu'à la pointe Lima; de là, jusqu'à la pointe Hunt, sur l'île Porcher; de là, vers l'ouest et le long du rivage, jusqu'à la pointe Pearce; de là, jusqu'à la pointe Morrell, sur l'île Prescott; de là, le long du rivage est, jusqu'à une balise située au passage Stephens; de là, jusqu'à une balise située sur l'île Stephens opposée; de là, vers le nord et le long du rivage, jusqu'à la pointe Riel; de là, jusqu'à l'extrémité est de l'île Avery; de là, vers le nord et le long du rivage, jusqu'à l'extrémité nord-ouest de l'île Avery; de là, jusqu'au rocher Harris; et de là, jusqu'à la pointe Deans, sur l'île Melville.

Sous-secteur 4-10

Les eaux du havre Prince Rupert et les eaux adjacentes bornées, à l'ouest, par une ligne tirée à partir de la pointe Straith, sur l'île Digby, jusqu'à la pointe Observation, sur le continent; et bornées, au sud, par une ligne tirée à partir de la pointe Lima, sur l'île Digby, jusqu'à l'extrémité sud de l'île Kaien; de là, le long du rivage nord-ouest, jusqu'à la pointe Ritchie; et de là, jusqu'à la pointe Pethick, sur la péninsule Tsimpsean.

Sous-secteur 4-11

Les eaux du havre Porpoise, du bassin Wainwright et de la baie Morse, ainsi que les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de l'extrémité sud de l'île Kaien, jusqu'à l'extrémité nord-ouest de l'île Ridley; de là, vers le sud et le long du rivage est, jusqu'à l'extrémité sud de l'île Ridley; de là, jusqu'à l'extrémité ouest de l'île Lelu; de là, vers le nord et le long du rivage, jusqu'à l'extrémité nord de l'île Lelu; de là, jusqu'à une balise située sur la rive opposée de la péninsule Tsimpsean; et bornées, au nord, par une ligne tirée à partir de la pointe Pethick, jusqu'à la pointe Ritchie, sur l'île Kaien.

Subarea 4-12

Those waters of Chatham Sound and adjacent waters inside a line from Hunt Point on Porcher Island thence to Lima Point on Digby Island, thence to the southernmost point of Kaien Island, thence to the northwesternmost point of Ridley Island, thence southerly along the shoreline to the southernmost point, thence to the westernmost point of Lelu Island, thence northerly along the shoreline to the northernmost point of Lelu Island, thence true east to a marker on the shore of Tsimpsean Peninsula, thence southeasterly along the shoreline to Gust Point, thence to Clara Point on De Horsey Island, thence southerly along the eastern shoreline to Parry Point, thence to the navigation light on Marked Tree Bluff on Kennedy Island, thence southerly along the shoreline to a marker true west of Inrig Point on the mainland, thence to Inrig Point, thence southerly along the shore to Buckley Point, thence to the northernmost point of Gibson Island, thence to Peninsula Point on Porcher Island, thence northerly along the eastern shoreline to the point of commencement.

Subarea 4-13

Those waters of Brown Passage and adjacent waters inside a line from Deans Point on Melville Island, thence to Triple Islands Light, thence to Butterworth Rocks light, thence to Harris Rock, thence to the point of commencement.

Subarea 4-14

Those waters of Cunningham Passage and adjacent waters inside a line from Redcliff Point on the mainland, thence to Duncan Point on Finlayson Island, thence southerly along the shoreline to Fortune Point, thence to the northernmost point of Mist Island, thence to the westernmost Island of Flat Top Islands, thence to the easternmost point of Green Mound, thence true east to a marker on Tsimpsean Peninsula, thence to the point of commencement.

Subarea 4-15

Those waters of Telegraph Passage and adjacent waters inside a line from Mowitch Point on Tsimpsean Peninsula, thence westerly along the shoreline to Gust Point, thence to Clara Point on De Horsey Island, thence southerly along the eastern shoreline to Parry Point, thence to the navigation light at Marked Tree Bluff on Kennedy Island, thence southerly along the shoreline to a marker true west of Inrig Point on the mainland, thence to Inrig Point, thence northerly along the shoreline to a marker approximately one and one half miles easterly of Veitch Point, thence to the point of commencement.

Sous-secteur 4-12

Les eaux du goulet Chatham ainsi que les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de la pointe Hunt, sur l'île Porcher, jusqu'à la pointe Lima, sur l'île Digby; de là, jusqu'à l'extrémité sud de l'île Kaien; de là, jusqu'à l'extrémité nord-ouest de l'île Ridley; de là, vers le sud et le long du rivage jusqu'à l'extrémité sud; de là, jusqu'à l'extrémité ouest de l'île Lelu; de là, vers le nord le long du rivage jusqu'à l'extrémité nord de l'île Lelu; de là, vers l'est vrai jusqu'à une balise située sur la rive de la péninsule Tsimpsean; de là, vers le sud-est et le long du rivage jusqu'à la pointe Gust; de là, jusqu'à la pointe Clara sur l'île De Horsey; de là, vers le sud le long du rivage est jusqu'à la pointe Parry; de là, jusqu'au feu de navigation sur Marked Tree Bluff sur l'île Kennedy; de là, vers le sud, le long du rivage jusqu'à une balise située à l'ouest vrai de la pointe Inrig sur le continent; de là, jusqu'à la pointe Inrig; de là, vers le sud et le long de la rive jusqu'à la pointe Buckley; de là, jusqu'à l'extrémité nord de l'île Gibson; de là, jusqu'à la pointe Peninsula sur l'île Porcher; de là, vers le nord et le long du rivage est jusqu'au point d'origine.

Sous-secteur 4-13

Les eaux du passage Brown et les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de la pointe Deans, sur l'île Melville; de là, jusqu'au feu des îles Triple; de là, jusqu'au feu des rochers Butterworth; de là, jusqu'au rocher Harris; et de là, jusqu'au point d'origine.

Sous-secteur 4-14

Les eaux du passage Cunningham et les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de la pointe Redcliff, sur le continent; de là, jusqu'à la pointe Duncan, sur l'île Finlayson; de là, vers le sud et le long de la rive, jusqu'à la pointe Fortune; de là, jusqu'à l'extrémité nord de l'île Mist; de là, jusqu'à l'île située le plus à l'ouest des îles Flat Top; de là, jusqu'à l'extrémité est du tertre Green; de là, vers l'est vrai, jusqu'à une balise située sur la péninsule Tsimpsean; et de là, jusqu'au point d'origine.

Sous-secteur 4-15

Les eaux de la passe Telegraph ainsi que les eaux adjacentes qui s'étendent en deçà d'une ligne tirée de la pointe Mowitch sur la péninsule Tsimpsean; de là, vers l'ouest le long du rivage jusqu'à la pointe Gust; de là, jusqu'à la pointe Clara sur l'île De Horsey; de là, vers le sud le long du rivage est jusqu'à la pointe Parry; de là, jusqu'au feu de navigation à Marked Tree Bluff sur l'île Kennedy; de là, vers le sud le long du rivage jusqu'à une balise située à l'ouest vrai de la pointe Inrig sur le continent; de là, jusqu'à la pointe Inrig; de là, vers le nord le long du rivage jusqu'à une balise située à environ un mille et demi à l'est de la pointe Veitch; de là, jusqu'au point d'origine.

(b) Area 5 is composed of Subareas as follows:

Subarea 5-1

Those waters of Grenville channel and adjacent waters bounded on the north by a line from Buckley Point on the mainland to the northern most point of Gibson Island, thence to Peninsula Point on Porcher Island; and bounded on the south by a line from Baron Point on the mainland to Bonwick Point on Pitt Island, thence northwesterly along the shoreline to Rippon Point, thence to Peninsula Point on Porcher Island.

Subarea 5-2

Those waters of Ogden Channel and adjacent waters inside bounded on the north by a line from Rippon Point on Pitt Island to Peninsula Point on Porcher Island, and on the south by a line from Sparrowhawk Point to the northwestern most point of McCauley Island, thence along the northerly shoreline to Strouts Point, thence true east to Pitt Island.

Subarea 5-3

Those waters of Kitkatla Channel and adjacent waters inside a line from Sparrowhawk Point on Porcher Island to the northwestern most point of McCauley Island, thence to the north tip of Browning Island, thence to the most northeastern tip of Dolphin Island, thence along the northerly shoreline to a marker at Kitkatla, thence to the eastern most point of a marker at Kitkatla, thence to the eastern most point of Goschen Island, thence to Chief Point on Porcher Island.

Subarea 5-4

Those waters of Kitkatla Inlet and adjacent waters bounded on the south by a line from Chief Point on Porcher Island to the eastern most point of Goschen Island, thence northerly along the shoreline to Nubble Point, thence to the northern most point of Coquitlam Island, thence to the eastern most point of Porcher Peninsula; and bounded on the north by a line from Whiteley Point on Porcher Island to Snass Point, thence true west to Gurd Island, thence along the northern shoreline to the western most point, thence true west to Porcher Peninsula.

Subarea 5-5

Those waters of Kitkatla Inlet and adjacent waters bounded on the south by a line from Snass Point on Porcher Island true west of Gurd Island; and bounded on the north by a line from Gurd Point on Gurd Island northerly approximately 356° true to a marker at the western entrance of Dries Inlet, thence to a marker on Porcher Island approximately one half mile south of Kitkatla Creek.

b) Le secteur 5 est composé des sous-secteurs suivants:

Sous-secteur 5-1

Les eaux du chenal Grenville et les eaux adjacentes bornées, au nord, par une ligne tirée à partir de la pointe Buckley, sur le continent, jusqu'à l'extrémité nord de l'île Gibson; de là, jusqu'à la pointe Peninsula, sur l'île Porcher; et bornées, au sud, par une ligne tirée à partir de la pointe Baron, sur le continent, jusqu'à la pointe Bonwick, sur l'île Pitt; de là, vers le nord-ouest et le long du rivage, jusqu'à la pointe Rippon; et de là, jusqu'à la pointe Peninsula, sur l'île Porcher.

Sous-secteur 5-2

Les eaux du chenal Ogden et les eaux adjacentes bornées, au nord, par une ligne tirée à partir de la pointe Rippon, sur l'île Pitt, jusqu'à la pointe Peninsula, sur l'île Porcher; et bornées, au sud, par une ligne tirée à partir de la pointe Sparrowhawk, jusqu'à l'extrémité nord-ouest de l'île McCauley; de là, le long du rivage nord, jusqu'à la pointe Strouts; et de là, vers l'est vrai, jusqu'à l'île Pitt.

Sous-secteur 5-3

Les eaux du chenal Kitkatla et les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de la pointe Sparrowhawk, sur l'île Porcher, jusqu'à l'extrémité nord-ouest de l'île McCauley; de là, jusqu'à l'extrémité nord de l'île Browning; de là, jusqu'à l'extrémité nord-est de l'île Dolphin; de là, le long du rivage nord, jusqu'à une balise située à Kitkatla; de là, jusqu'à l'extrémité est de l'île Goschen; et de là, jusqu'à la pointe Chief, sur l'île Porcher.

Sous-secteur 5-4

Les eaux de l'inlet Kitkatla et les eaux adjacentes bornées, au sud, par une ligne tirée à partir de la pointe Chief, sur l'île Porcher, jusqu'à l'extrémité est de l'île Goschen; de là, vers le nord et le long du rivage, jusqu'à la pointe Nubble; de là, jusqu'à l'extrémité nord de l'île Coquitlam; de là, jusqu'à l'extrémité est de la péninsule Porcher; et bornées, au nord, par une ligne tirée à partir de la pointe Whiteley, sur l'île Porcher, jusqu'à la pointe Snass; de là, vers l'ouest vrai, jusqu'à l'île Gurd; de là, le long du rivage nord, jusqu'à l'extrémité ouest de l'île; et de là, vers l'ouest vrai, jusqu'à la péninsule Porcher.

Sous-secteur 5-5

Les eaux de l'inlet Kitkatla et les eaux adjacentes bornées, au sud, par une ligne tirée à partir de la pointe Snass, sur l'île Porcher, vers l'ouest vrai, jusqu'à l'île Gurd; et bornées, au nord, par une ligne tirée à partir de la pointe Gurd, sur l'île Gurd, vers le nord et par environ 356° vrais, jusqu'à une balise située à l'entrée ouest de l'inlet Dries; et de là, jusqu'à une balise située sur l'île Porcher, à environ un demi-mille au sud du ruisseau Kitkatla.

Subarea 5-6

Those waters of Dries Inlet and adjacent waters northerly of a line from a marker at the western entrance of Dries Inlet to a marker on Porcher Island approximately one half mile south of Kitkatla Creek.

Subarea 5-7

Those waters of Serpentine Inlet and adjacent waters northerly of a line from a marker near the western entrance to Dries Inlet approximately 230° true to a marker on Porcher Peninsula near the southwestern entrance to Serpentine Inlet.

Subarea 5-8

Those waters of Kitkatla Inlet and adjacent waters bounded on the south by a line from the western most point of Gurd Island true west to Porcher Peninsula; and bounded on the north by a line from Gurd Point on Gurd Island northerly approximately 356° true to a marker at the western entrance of Dries Inlet, thence southwesterly approximately 230° true to a marker on Porcher Peninsula near the southwestern entrance to Serpentine Inlet.

Subarea 5-9

Those waters of Porcher Inlet and adjacent waters northerly of a line from Whiteley Point on Porcher Island to Snass Point on Porcher Island.

Subarea 5-10

Those waters of Browning Entrance and adjacent waters inside a line from the northwestern most point of McCauley Island to the north tip of Browning Island, thence true west to the northeastern tip of Dolphin Island, thence along the northerly shoreline to a marker at Kitkatla, thence to the eastern most point of Goschen Island, thence southerly along the shoreline to Viscount Point, thence to the northern most point of Banks Island, thence to Baird Point on McCauley Island.

Subarea 5-11

Those waters of Browning Entrance and adjacent waters inside a line from Viscount Point on Goschen Island to the northern most point of Banks Island, thence westerly along the shoreline to the northwestern most point of Banks Island, thence to White Rocks light, thence true west to the surfline, thence northerly along the surfline to a point true west of Cape George on Porcher Peninsula, thence true east to Cape George, thence to Joachim Point on Goschen Island.

Sous-secteur 5-6

Les eaux de l'inlet Dries et les eaux adjacentes qui s'étendent au nord d'une ligne tirée à partir de la balise située à l'entrée ouest de l'inlet Dries, jusqu'à une balise située sur l'île Porcher, à environ un demi-mille au sud du ruisseau Kitkatla.

Sous-secteur 5-7

Les eaux de l'inlet Serpentine et les eaux adjacentes qui s'étendent au nord d'une ligne tirée à partir d'une balise située près de l'entrée ouest de l'inlet Dries, par 230° vrais environ, jusqu'à une balise située sur la péninsule Porcher, près de l'entrée sud-ouest de l'inlet Serpentine.

Sous-secteur 5-8

Les eaux de l'inlet Kitkatla et les eaux adjacentes bornées, au sud, par une ligne tirée à partir de l'extrémité ouest de l'île Gurd, vers l'ouest vrai, jusqu'à la péninsule Porcher; et bornées, au nord, par une ligne tirée à partir de la pointe Gurd, sur l'île Gurd, vers le nord et par environ 356° vrais, jusqu'à une balise située à l'entrée ouest de l'inlet Dries; et de là, vers le sud-ouest et par environ 230° vrais, jusqu'à une balise située sur la péninsule Porcher, près de l'entrée sud-ouest de l'inlet Serpentine.

Sous-secteur 5-9

Les eaux de l'inlet Porcher et les eaux adjacentes qui s'étendent au nord d'une ligne tirée à partir de la pointe Whiteley, sur l'île Porcher, jusqu'à la pointe Snass, sur l'île Porcher.

Sous-secteur 5-10

Les eaux de l'entrée Browning et les eaux adjacentes qui s'étendent en déçà d'une ligne tirée à partir de l'extrémité nord-ouest de l'île McCauley, jusqu'à l'extrémité nord de l'île Browning; de là, vers l'ouest vrai, jusqu'à l'extrémité nord-ouest de l'île Dolphin, de là, le long du rivage nord, jusqu'à une balise située à Kitkatla; de là, jusqu'à l'extrémité est de l'île Goschen; de là, vers le sud et le long du rivage, jusqu'à la pointe Viscount; de là, jusqu'à l'extrémité nord de l'île Banks; et de là, jusqu'à la pointe Baird, sur l'île McCauley.

Sous-secteur 5-11

Les eaux de l'entrée Browning et les eaux adjacentes qui s'étendent en déçà d'une ligne tirée à partir de la pointe Viscount, sur l'île Goschen, jusqu'à l'extrémité nord de l'île Banks; de là, vers l'ouest et le long du rivage, jusqu'à l'extrémité nord-ouest de l'île Banks, de là, jusqu'au feu des rochers White; de là, vers l'ouest vrai jusqu'à la ligne de démarcation; de là, vers le nord et le long de la ligne de démarcation, jusqu'à un point situé à l'ouest vrai du cap George, sur la péninsule Porcher; de là, vers l'est vrai, jusqu'au cap George; et de là, jusqu'à la pointe Joachim, sur l'île Goschen.

Subarea 5-12

Those waters of Freeman Passage and adjacent waters bounded on the northeast by a line from Nubble Point on Goschen Island to the northern most point of Coquitlam Island, thence to the eastern most point of Porcher Peninsula; and bounded on the southwest by a line from Joachim Point on Goschen Island to Cape George on Porcher Peninsula.

Subarea 5-13

Those waters of Principe Channel and adjacent waters bounded on the north by a line from the northern most point of Banks Island to Baird Point on McCauley Island; and bounded on the south by a line from Meet Point on McCauley Island true south to Wright Island, thence along the southern shoreline to Gibbons Point, thence to Headwind Point on Banks Island.

Subarea 5-14

Those waters of Petrel Channel and adjacent waters bounded on the north by a line from Strouts Point on McCauley Island true east to Pitt Island; on the south by a line from Petrel Point on Pitt Island to Foul Point on Anger Island, thence to Gibbons Point on Wright Island, thence along the southerly shoreline to a point true south of Meet Point on McCauley Island, thence true north to Meet Point on McCauley Island, and on the east by a line from Stark Point to Hevenor Point at the entrance to Hevenor Inlet.

Subarea 5-15

Those waters of Hevenor Inlet and adjacent waters inside and easterly of a line from Stark Point to Hevenor Point.

Subarea 5-16

Those waters of Ala Passage and adjacent waters bounded on the west by a line from Petrel Point on Pitt Island to Foul Point on Anger Island; and bounded on the south by a line from Becker Point on Pitt Island to the southern most point of Anger Island.

Subarea 5-17

Those waters of Principe Channel and adjacent waters bounded on the north by a line from Headwind Point on Banks Island to Gibbons Point on Wright Island, thence to Foul Point on Anger Island, thence southerly along the shoreline to the southern most point of Anger Island, thence to Becker Point on Pitt Island; and bounded on the south by a line from Fleishman Point on Pitt Island to Deer Point on Banks Island, but not including the waters of Area 5-18 and Area 5-19 bordering on the east side.

Sous-secteur 5-12

Les eaux du passage Freeman et les eaux adjacentes bornées, au nord-est, par une ligne tirée à partir de la pointe Nubble, sur l'île Goschen, jusqu'à l'extrémité nord de l'île Coquitlam; de là, jusqu'à l'extrémité est de la péninsule Porcher; et bornées, au sud-ouest, par une ligne tirée à partir de la pointe Joachim, sur l'île Goschen, jusqu'au cap George, sur la péninsule Porcher.

Sous-secteur 5-13

Les eaux du chenal Principe et les eaux adjacentes bornées, au nord, par une ligne tirée à partir de l'extrémité nord de l'île Banks, jusqu'à la pointe Baird, sur l'île McCauley; et bornées, au sud, par une ligne tirée à partir de la pointe Meet, sur l'île McCauley, vers le sud vrai, jusqu'à l'île Wright; de là, le long du rivage sud, jusqu'à la pointe Gibbons; et de là, jusqu'à la pointe Headwind, sur l'île Banks.

Sous-secteur 5-14

Les eaux du chenal Petrel et les eaux adjacentes bornées, au nord, par une ligne tirée à partir de la pointe Strouts, sur l'île McCauley, vers l'est vrai, jusqu'à l'île Pitt; bornées, au sud, par une ligne tirée à partir de la pointe Petrel, sur l'île Pitt, jusqu'à la pointe Foul, sur l'île Anger; de là, jusqu'à la pointe Gibbons, sur l'île Wright; de là, le long de la rive sud, jusqu'à un point situé au sud vrai de la pointe Meet, sur l'île McCauley; de là, vers le nord vrai, jusqu'à la pointe Meet, sur l'île McCauley; et bornées, à l'est, par une ligne tirée à partir de la pointe Stark, jusqu'à la pointe Hevenor, à l'entrée de l'inlet Hevenor.

Sous-secteur 5-15

Les eaux de l'inlet Hevenor et les eaux adjacentes qui s'étendent en deçà et à l'est d'une ligne tirée à partir de la pointe Stark, jusqu'à la pointe Hevenor.

Sous-secteur 5-16

Les eaux du passage Ala et les eaux adjacentes bornées, à l'ouest, par une ligne tirée à partir de la pointe Petrel, sur l'île Pitt, jusqu'à la pointe Foul, sur l'île Anger; et bornées, au sud, par une ligne tirée à partir de la pointe Becker, sur l'île Pitt, jusqu'à l'extrémité sud de l'île Anger.

Sous-secteur 5-17

Les eaux du chenal Principe et les eaux adjacentes bornées, au nord, par une ligne tirée à partir de la pointe Headwind, sur l'île Banks, jusqu'à la pointe Gibbons, sur l'île Wright; de là, jusqu'à la pointe Foul, sur l'île Anger; de là, vers le sud et le long du rivage, jusqu'à l'extrémité sud de l'île Anger; de là, jusqu'à la pointe Becker, sur l'île Pitt; et bornées, au sud, par une ligne tirée à partir de la pointe Fleishman, sur l'île Pitt, jusqu'à la pointe Deer, sur l'île Banks, à l'exclusion des eaux des sous-secteurs 5-18 et 5-19 en bordure, du côté est.

Subarea 5-18

Those waters of Mink Trap Bay, Patterson Inlet, and adjacent waters easterly of a line from Annie Point on Pitt Island northerly approximately 345° true to a marker on Pitt Island near the northerly entrance to Mink Trap Bay.

Subarea 5-19

Those waters of Port Stephens, Monckton Inlet, and adjacent waters easterly of a line from Littlejohn Point on Pitt Island to a marker on Pitt Island near Cranston Island.

Subarea 5-20

Those waters of Hecate Strait and adjacent waters inside a line from the northwestern most point of Banks Island to White Rocks light, thence true west to the surfline, thence along the surfline southerly to a point true west of Kelp Point on Banks Island, thence true east to Kelp Point, and not including the waters of Kingkown Inlet Area 5-21.

Subarea 5-21

Those waters of Kingkown Inlet and adjacent waters easterly of a line from a marker on Banks Island southeasterly approximately 122° true from Cliff Point on Antle Islands thence to Cliff Point, thence to the western most point of the most northern of the Antle Islands, thence in a straight line to Laverock Point on Banks Island.

Subarea 5-22

Those waters of Hecate Strait and adjacent waters inside of a line from Kelp Point on Banks Island true west to the surfline, thence southerly along the surfline to Terror Point, thence true northeast to Banks Island.

Subarea 5-23

Those waters of Grenville Channel and adjacent waters bounded on the north by a line from Baron Point on the mainland to Bonwick Point on Pitt Island; and bounded on the south by a line from Ormiston Point on Pitt Island true east to the mainland.

Subarea 5-24

Those waters of Grenville Channel bounded on the north by a line from Ormiston Point on Pitt Island true east to the mainland; and bounded on the south by a line from Sainty Point on the mainland to Yolk Point on Farrant Island, thence along the southerly shoreline to a marker at Peters Narrows, thence westerly to a marker on Pitt Island.

Sous-secteur 5-18

Les eaux de la baie Mink Trap et de l'inlet Patterson, ainsi que les eaux adjacentes qui s'étendent à l'est d'une ligne tirée à partir de la pointe Annie, sur l'île Pitt, vers le nord et par environ 345° vrais, jusqu'à une balise située sur l'île Pitt, près de l'entrée nord de la baie Mink Trap.

Sous-secteur 5-19

Les eaux de Port Stephens et de l'inlet Monckton, ainsi que les eaux adjacentes qui s'étendent à l'est d'une ligne tirée à partir de la pointe Littlejohn, sur l'île Pitt, jusqu'à une balise située sur l'île Pitt, près de l'île Cranston.

Sous-secteur 5-20

Les eaux du détroit d'Hecate et les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de l'extrémité nord-ouest de l'île Banks, jusqu'au feu des rochers White; de là, vers l'ouest vrai, jusqu'à la ligne de démarcation; de là, le long de la ligne de démarcation et vers le sud, jusqu'à un point situé à l'ouest vrai de la pointe Kelp, sur l'île Banks; de là, vers l'est vrai, jusqu'à la pointe Kelp, à l'exclusion des eaux du sous-secteur 5-21 de l'inlet Kingkown.

Sous-secteur 5-21

Les eaux de l'inlet Kingkown et les eaux adjacentes qui s'étendent à l'est d'une ligne tirée à partir d'une balise située sur l'île Banks, vers le sud-est et par environ 122° vrais à partir de la pointe Cliff, dans les îles Antle; de là, jusqu'à la pointe Cliff; de là, jusqu'à l'extrémité ouest de l'île nord des îles Antle; et de là, en droite ligne, jusqu'à la pointe Laverock, sur l'île Banks.

Sous-secteur 5-22

Les eaux du détroit d'Hecate et les eaux adjacentes qui s'étendent en deçà d'une ligne tirée à partir de la pointe Kelp, sur l'île Banks, vers l'ouest vrai, jusqu'à la ligne de démarcation; de là, vers le sud et le long de la ligne de démarcation, jusqu'à la pointe Terror; et de là, vers le nord-est vrai, jusqu'à l'île Banks.

Sous-secteur 5-23

Les eaux du chenal Grenville et les eaux adjacentes bornées, au nord, par une ligne tirée à partir de la pointe Baron, sur le continent, jusqu'à la pointe Bonwick, sur l'île Pitt; et bornées, au sud, par une ligne tirée à partir de la pointe Ormiston, sur l'île Pitt, vers l'est vrai, jusqu'au continent.

Sous-secteur 5-24

Les eaux du chenal Grenville bornées, au nord, par une ligne tirée à partir de la pointe Ormiston, sur l'île Pitt, vers l'est vrai, jusqu'au continent; et bornées, au sud, par une ligne tirée à partir de la pointe Sainty, sur le continent, jusqu'à la pointe Yolk, sur l'île Farrant; de là, le long de la rive sud, jusqu'à une balise située au goulet Peters; et de là, vers l'ouest, jusqu'à une balise située sur l'île Pitt.

CALENDARS
1800 TO 2050

DIRECTIONS FOR USE

Look for the year you want in the index at left. The number opposite each year is the number of the calendar to use for that year.

2

1

STAFF AND MANAGEMENT RESOURCES AREA 4/5

Acting Chief of Resource Management - Greg Savard

Salmon/Herring Fish Manager - Vacant

Species Coordinator - Dan Wagner

North Coast Biologist - Les Jantz

Fishery Officers/Wardens/Guardians

The following from offices in Terrace, Hazelton and Smithers worked almost exclusively on the Skeena River and tributaries:

| | | |
|---------------|----------------|---------------|
| John Hipp | Nicole Gallant | Monte Bromley |
| Pete Woloshyn | Gerry Cockell | Trina Belcher |
| Todd Deueau | Terry Turnbull | Gary Cardinal |
| Doug Hollands | Sam Wright | Andrew Lotto |

A pool of Fisheries Officers, Wardens and Guardians has been established in Prince Rupert to work in Areas 3, 4, 5 & 6. The pool of personal was:

| | | |
|--------------|--------------|-------------|
| Mike Murphy | Matt Leggeat | Sean Ward |
| Ken Green | Shane Neifer | Ben York |
| Kent Spencer | Leone Bodie | Ed Thorburn |
| Jim Robson | Rob Melvin | John Inkpen |
| Dave Knapton | Robb Wilson | |

Charter Patrolmen

| Vessel/Operator | Dates | No. | Cost | Total | |
|-------------------------------|---------|----------|------|----------|-------------|
| | Start | Finish | Days | Per Day | |
| Princeton I/ David Lewis | June 22 | Oct. 10 | 90 | \$370.00 | \$33,300.00 |
| Albacore II/ Jim Gale | June 15 | Sept. 16 | 80 | \$250.00 | \$20,000.00 |
| Blythe Isle/ Robert Nelson | June 28 | Aug. 15 | 35 | \$350.00 | \$12,250.00 |
| William Frowd/ Katherine B | June 28 | Oct. 18 | 95 | \$390.00 | \$37,050.00 |
| Kent Wyles/ Grizzly Bear | June 11 | Sept. 30 | 95 | \$400.00 | \$38,000.00 |

Patrol Vessels

The Petrel Rock worked the entire salmon season in Area 4. The Beaver Rock worked in Areas 5 & 4. The Lewis Reef, Tanu and Kitimat II spent some time during the season in Area 4.

Aircraft

A gear count for all of Area 4 was conducted at the start of most fisheries and occasional mid fishery during long openings. All gear counts were done by fixed wing.

Chinook and coho stocks were enumerated with a Bell 206 helicopter for a cost of \$2703.57. The streams inspected were the Ecstall and Khyex Rivers.

ADEQUACY OF RESOURCES

The resources to manage the fishery were similar to the last few years. Concerns and success are as follows:

- Salmon escapement assessment for most coastal streams was adequate(excellent weather in 1993 was a large contributing factor to the success) with the exception of:

The Ecstall River chinook estimate has a low reliability. Only one helicopter inspection was done. The main reason for this is the unusually hot weather maintained high glacial silt levels all summer. After the first flight it was felt that the funds could be spent on more worth while programs unless cooler weather arrived. More than one flight is necessary to make an accurate estimate.

Ecstall River coho were inspected by helicopter once. One additional flight would improve the reliability of the estimate.

Some former Waterfront Sub-district stocks were only inspected once or not at all this year. The reliability of these estimates is low. More Fishery Officer/Guardian time is needed to improve the information. These streams include Denise Creek, Diana Creek, Kloiya River, and Shawatlan Creek.

- Salmon escapement assessment in the Skeena River and tributaries was similar to the last few years with the exception of :

Hazelton area coho stocks (Kispiox and Other Middle Skeena Sub-areas) were not inspected, a result of reduced Guardian time in the fall.

Babine Sub-area sockeye stocks estimates were either of low reliability, unknown or not inspected. The Lake Babine Band was to inspect many of these stocks. However, many of the streams were inspected at the wrong time (well past peak spawning etc.) Conservation & Protection personnel in the area changed priorities to enforcement issues. Little or no coordination occur between DFO and the Band concerning stream inspections.

- In general more reliable chinook and coho estimates could be made if more helicopter time was available.

- The abundance of summer run steelhead and early Skeena coho has become a major consideration in the management of the commercial net fishery. However escapement information is poor for these stocks. A substantial amount of Skeena/Kitimat Green Plan funds will likely be directed to coho and steelhead stock assessment in 1994. Present programs and plans to address the concern include:

A PSARC working paper by B. Holtby, R. Kadowaki and L. Jantz "An Update of the Status of Early Run Skeena River Coho Salmon" (Through the 1993 Return Year). This paper reviews, the Skeena River coho test fishery index, Elliott Creek helicopter survey counts, Houston and Babine fence counts, juvenile surveys in the Bulkely and Morice Rivers and coded wire tag data.

Management Biology in Prince Rupert is preparing a review of coho exploitation by fishery using coded wire tag recovery information.

The fence on the upper Sustuk for the second year in a row enumerated steelhead.

- For much of the time in Area 5 only one vessel was available for gathering hauls, a reduction from three in the past. The patrolman in the area went to extraordinary efforts to provide the best information possible (this type of effort can not be sustained). However the quality of information was reduced. If stocks in the area return at higher levels the lack of information could cause management problems.

- Fixed wing gear counts improve catch estimates greatly.

- Sport fishing effort and catch information is inadequate. Present information represents a minimum known catch only. The actual catch may be significantly higher. The change in work priorities for Conservation and Protection in the Smithers area resulted in no sport fish information for the Babine and Bear/Sustut Rivers.

- Area 4 has some persistent enforcement problems which demand attention every year, these are:

- Compliance with the steelhead live tank program
- Early gillnet sets in 4-15
- Gillnets fishing above the 4-15 boundary

SKEENA AND GRENVILLE PRINCIPE ENFORCEMENT SUMMARY 1994

The following is a list of charges (C) and warnings(W) laid in the Skeena Watershed Areas 4 & 5.

AREA 4 & 5

Commercial:

| | |
|--|--------|
| Fish in closed area..... | 3 (C) |
| Fish with over length net..... | 1 (C) |
| Fail to comply with terms of licence..... | 1 (C) |
| Fail to produce/Fish without F. Reg. Card..... | 15 (C) |
| Assault & Obstruction of Fishery Officer..... | 1 (C) |

Sport:

| | |
|---------------------------------|-------|
| Fish without Tidal Licence..... | 3 (C) |
|---------------------------------|-------|

Comments:

- A good deal of effort was spent monitoring protests and potential protest fisheries concerning commercial net closers to protect Skeena River steelhead. No charges were laid as a result of this monitoring program.

SKEENA WATERSHED

| | | |
|---|--------|--------|
| British Columbia Sport Fishing Regulations..... | 34 (C) | 14 (W) |
| Fisheries Act (habitat)..... | 1 (C) | |
| B.C. (General) Regulations..... | 17 (C) | 3 (W) |
| Wildlife Act..... | 12 (C) | 12 (W) |

Comments:

- The section 35 fishery went well. The interaction between the Department and Fisheries and Oceans and the native enforcement people improved relations. Each tribal group's enforcement program had different emphasis.

- The illegal sale of food fish continues to be a problem. Similar problems at Meziadin occupied most of the staff, resulting in limited enforcement on the Skeena. A dedicated enforcement group is needed to effectively deal with illegal sales.

- Skeena sport fisheries were generally well patrolled during week days with the exception of some of the more remote locations.

- Enforcement activities declined in 1993 due to a restricted overtime budget, less staff and more emphasis being placed on interacting with native fisheries. Thirty investigations were not undertaken due to staff shortages.

1993 salmon net fishing plans

| Area | Week of | <u>Weekly Starting</u> | | Seines | Gillnets | Area open and remarks |
|------|-------------|------------------------|---------|--------|----------|---|
| | | Hour | Day | | | |
| 3 | Jun15-Jun19 | 0800 | Tuesday | | 12hrs | Sub-area 3-1 north of a line running true west from Arniston Point, 3-2, 3-3, 3-4, 3-7, 3-12(south of a line from Trefusis Point to a boundary sign on Pearse Island approximately 1.75 miles north of Lizard Point Light). Extentions and further openings dependent on sockeye run strength. Max mesh 137 mm. |
| 3 | Jun21-Jun26 | 1800 | Monday | | 1.0day | |
| 3 | Jul18-Jul24 | 1800 | Sunday | 1.0day | 1.0day | Sub-area 3-1, 3-2, 3-3, 3-4, 3-7, 3-11, 3-12(South of a line from Trefusis Point to a boundary sign 1.75 miles north of Lizard Point Light). 3-17 may also open, but will depend on sockeye and pink stock strength. Min bunt size 70 mm. Max gillnet mesh 165 mm. |
| 4 | Jun28-Jul13 | 1800 | Monday | | 1.0day | Sub-areas 4-1, 4-2, 4-3, 4-4, 4-5, 4-8, 4-9, 4-12, 4-13, 4-14, 4-15. Max mesh 137mm. |
| | | | | | | Subsequent gillnet openings dependent on run strength. |
| 4 | Jul25-Jul31 | | | | | Seine openings to be determined on stock strength |
| 4 | Aug2-Aug7 | | | | | Proposed date for pink salmon management. Max mesh 121 mm. |
| 5 | Jun28-Jul13 | 1800 | Monday | | 1.0day | Sub-area 5-1, 5-2, 5-3, 5-10, 5-11, 5-12, and a portion of 5-13 north of a line from a boundary sign approximately 1 mile north of Keswar Point In Principe Channel to a boundary sign on the Banks Island shore opposite. Max mesh size 137 mm. |
| 5 | Jul18-Jul24 | 1800 | Sunday | 1.0day | 1.0day | Sub-area 5-1, 5-2, 5-3, 5-10, 5-11, 5-12, and a portion of 5-13 north of a line from a boundary sign approximately 1 mile north of Keswar Point In Principe Channel to a boundary sign on the Banks Island shore opposite. |

AREA 4 & 5 WEEKLY MANAGEMENT PLAN

TARGET SPECIES: Skeena River Sockeye
FOR FISHING PERIOD: June 27 to July 03/93

MANAGEMENT ACTIONS FOR THE CURRENT WEEK

Management Objectives: To assess and harvest Skeena sockeye stocks

Date and Time Open: 1800 hrs. June 28

Anticipated Date and Time Closed: 1800 hrs. June 29

Subareas Open: 4-1 to 4-5, 4-8, 4-9, 4-12 to 4-15
5-1 to 5-3, 5-10 to 5-12 & 5-13 N. of a line from
a boundary sign approx. 1 mile N. of Keswar Pt. in
Principe Ch. to a boundary sign on Banks Island
shore opposite.

Gear Restrictions: Gn. only, with a max. mesh of 137mm.

Extensions: 24hrs.

CURRENT WEEK MANAGEMENT INFORMATION

- 12 hour hauls indicate good fishing particularly on the outside.
- the test fishery indicates good escapements as of June 29.
- Tree Pt. information suggests strong catches.
- 36 hr hauls indicate good fishing particularly on the outside.
- the escapement has slowed significantly as of June 30. Still expect to meet weekly target.

CURRENT WEEK RECOMMENDATION

Close after 48 hours

NEXT WEEK'S RECOMMENDATION

Open to Gn. 1800hrs Sunday. July 04 for 48 hrs. same boundaries and restrictions as this week.

AREA 4 & 5 WEEKLY MANAGEMENT PLAN

TARGET SPECIES: Skeena River Sockeye
FOR FISHING PERIOD: July 04 to July 10/93

MANAGEMENT ACTIONS FOR THE CURRENT WEEK

Management Objectives: To assess and harvest Skeena sockeye stocks

Date and Time Open: 1800 hrs. July 04

Anticipated Date and Time Closed: 1800 hrs. July 06

Subareas Open: 4-1 to 4-5, 4-8, 4-9, 4-12 to 4-15
5-1 to 5-3, 5-10 to 5-12 & 5-13 N. of a line from
a boundary sign approx. 1 mile N. of Keswar Pt. in
Principe Ch. to a boundary sign on Banks Island
shore opposite.

Gear Restrictions: Gn. only, with a max. mesh of 137mm.

Extensions: - 30hrs. commencing 12:00 hrs. July 08
- 04hrs. to 22:00 hrs. July 09

CURRENT WEEK MANAGEMENT INFORMATION

- hail information Tuesday morning was incomplete but generally indicated good fishing.
- the test fishery indicates good escapements as of July 05.
- processors are concerned with fish quality and request that net fisheries not be open for more than two continuous days without a two day closer.
- as of Wednesday July 07 the escapement and updated hail information indicate strong returns of Skeena sockeye.
- on Friday morning July 09, catches and escapements suggest the weekly desired Skeena River sockeye escapement will be exceeded.
- slack tide in the River between 8 & 9 PM.
- a Tshimshain section 35 fishery scheduled for Saturday and Sunday July 10/11.

CURRENT WEEK RECOMMENDATION

- close after 48 hours to further assess escapement, hail information and address processors concerns.
- reopen for 30 hrs. at 12:00 July 08.
- extend only 4 hours until 22:00hrs. July 9th. to, catch the slack tide, maximize harvest, close during day light and still allow time for the section 35 fishery.

NEXT WEEK'S RECOMMENDATION

Open to Gn. 1200hrs monday. July 12 for 54hrs. same boundaries and restrictions as this week.

AREA 4 AND 5 HAIL DATA

Fishing period: 18:00h July 04 to 06:00 July 05/93

AREA 4 AND 5 HAIL DATA

AREA 4 & 5 WEEKLY MANAGEMENT PLAN

TARGET SPECIES: Skeena River Sockeye
FOR FISHING PERIOD: July 11 to July 17/93

MANAGEMENT ACTIONS FOR THE CURRENT WEEK

Management Objectives: To assess and harvest Skeena sockeye.

Date and Time Open: 1200 hrs. July 12

Anticipated Date and Time Closed: 1800 hrs. July 14

Subareas Open: 4-1 to 4-5, 4-8, 4-9, 4-12 to 4-15
5-1 to 5-3, 5-10 to 5-12 & 5-13 N. of a line from
a boundary sign approx. 1 mile N. of Keswar Pt. in
Principe Ch. to a boundary sign on Banks Island
shore opposite.

Gear Restrictions: Gn. only, with a max. mesh of 137mm.

Extensions: - 14hrs. commencing 18:00 hrs. July 14.
60hrs. commencing 06:00 hrs. July 17 to nets except
4-12 and 4-15 are gillnet only .

CURRENT WEEK MANAGEMENT INFORMATION

- the test fishery indicates that the desired weekly escapement for Skeena sockeye will be exceeded.
- processors agree to be more flexible with the maximum of a two day consecutive fishery/two day break plan especially with:
 1. gillnet only fisheries.
 2. in particular this week to allow for native fisheries prior to seine fishing when quality concerns are higher.
- it is preferable to fish no more than 4 days per week to address conservation concerns for incidental species.
- the abundance of incidental species is low at this time of year.
- it may be better to exceed the 4 day total per week at this time of year and restrict fishing more later when the abundance of incidental species is higher.
- fishery openings and closers should take into account tides to maximize sockeye harvest.
- concerned with the sn/gn sockeye allocation of 24/76 and the large total to date gillnet sockeye catch.

CURRENT WEEK RECOMMENDATION

- extend 14 hrs. commencing 18:00hrs. July 14.
- reopen 06:00hrs. July 17th to nets for 60 hours except 4-12 and 4-15 are gillnet only.

NEXT WEEK'S RECOMMENDATION

Open to nets Saturday. July 17 for 60hrs. same boundaries and restrictions as this week. Gns. only in 4-12 and 4-15.

AREA 4 & 5 WEEKLY MANAGEMENT PLAN

TARGET SPECIES: Skeena River Sockeye
FOR FISHING PERIOD: July 18 to July 24/93

MANAGEMENT ACTIONS FOR THE CURRENT WEEK

Management Objectives: To harvest Skeena sockeye.

Date and Time Open: 1800 hrs. July 18th

Anticipated Date and Time Closed: 1800 hrs. July 19

Subareas Open: To nets, 4-1 to 4-5, 4-8, 4-9, & 4-13
5-1 to 5-3, 5-10 to 5-12 & 5-13 N. of a line from
a boundary sign approx. 1 mile N. of Keswar Pt. in
Principe Ch. to a boundary sign on Banks Island
shore opposite.

To gillnets only, 4-12 & 4-15

Gear Restrictions: Gn. only, with a max. mesh of 165mm.

Extensions: - 48hrs. to gillnets commencing 18:00 hrs. July 23rd
same boundaries & 36hrs. to seines commencing 06:00hrs. July 24th
in 4-1, 4-2, 4-3, 4-13 & the same boundaries in Area 5.

CURRENT WEEK MANAGEMENT INFORMATION

- for most of the week Skeena sockeye escapements as indicated by the test fishery are lower than desired.
- for fish quality, processors prefer to fish a maximum of two days consecutively, followed by a two day closer.
- steelhead sport fishing groups view the larger than anticipated sockeye return and the two day fishery/two days break, followed by another fishery in the same week as increasing the harvest rate of steelhead.
- the steelhead return appears poor.
- fishery openings and closers should take into account tides to maximize sockeye harvest.
- concerned with balancing the sn/gn sockeye allocation of 24/76 and harvesting the available surplus.

CURRENT WEEK RECOMMENDATION

- close at 18:00hrs. July 19th.
- reopen 18:00hrs. July 23rd to gillnets for 48 hours same boundaries and to seines at 06:00 hrs. July 24 for 36 hours in 4-1, 4-2, 4-3, 4-13 & same boundaries in Area 5.

NEXT WEEK'S RECOMMENDATION

Open to nets 18:00 Sunday July 25th for 24hrs. same boundaries and restrictions as this week with seines on the outside of Area 4 only.

AREA 4 & 5 WEEKLY MANAGEMENT PLAN

TARGET SPECIES: Skeena River Sockeye
FOR FISHING PERIOD: July 25 to July 31/93

MANAGEMENT ACTIONS FOR THE CURRENT WEEK

Management Objectives: To harvest Skeena sockeye.

Date and Time Open: 1800 hrs. July 25

Anticipated Date and Time Closed: 1800 hrs. July 26

Subareas Open: To nets, 4-1, 4-2, 4-3 & 4-13
5-1 to 5-3, 5-10 to 5-12 & 5-13 N. of a line from
a boundary sign approx. 1 mile N. of Keswar Pt. in
Principe Ch. to a boundary sign on Banks Island
shore opposite.

To gillnets only, 4-4, 4-5, 4-8, 4-9, 4-12 & 4-15

Gear Restrictions: Gn. only, with a max. mesh of 165mm.

Extensions: - 48hrs. commencing 18:00 hrs. July 28

CURRENT WEEK MANAGEMENT INFORMATION

- the test fishery indicates that the desired weekly escapement for Skeena sockeye will be exceeded.
- for fish quality, processors prefer to fish a maximum of two days consecutively, followed by a two day closer.
- steelhead sport fishing groups view the larger than anticipated sockeye return and the two day fishery/two days break, followed by another fishery in the same week as increasing the harvest rate of steelhead. DFO information suggest that under the forementioned scenario, that 3.5 days fishing equals the same harvest rate as 4 days.
- prior to this year a 4 day a week maximum fishery and 3 days closed to address conservation concerns for incidental species was considered the norm. This years fishing plan in August calls for stronger conservation measures to address both coho and sthd stock strength concerns.
- the steelhead return appears poor.
- the coho index is below minimum level.
- information suggests that the peak of some early run steelhead runs into the river will be next week.
- information suggests that this is peak fishing week for Skeena sockeye.
- fishery openings and closers should take into account tides to maximize sockeye harvest.
- concerned with balancing the sn/gn sockeye allocation of 24/76 and harvesting the available surplus.

CURRENT WEEK RECOMMENDATION

- close at 18:00hrs. July 26th.
- reopen 18:00hrs. July 28th to nets for 48 hours.

NEXT WEEK'S RECOMMENDATION

Open to nets Monday. August 2nd for 24hrs. same boundaries and restrictions as this week.

AREA 4 & 5 WEEKLY MANAGEMENT PLAN

TARGET SPECIES: Skeena River Sockeye
FOR FISHING PERIOD: August 01 to 07/93

MANAGEMENT ACTIONS FOR THE CURRENT WEEK

Management Objectives: To harvest Skeena sockeye.

Date and Time Open: 1800 hrs. August 2nd

Anticipated Date and Time Closed: 1800 hrs. August 3

Subareas Open: To nets, 4-1, 4-2, 4-3 & 4-13
5-1 to 5-3, 5-10 to 5-12 & 5-13 N. of a line from
a boundary sign approx. 1 mile N. of Keswar Pt. in
Principe Ch. to a boundary sign on Banks Island
shore opposite.

To gillnets only, 4-4, 4-5, 4-8, 4-9, 4-12 & 4-15

Gear Restrictions: Gn. max. mesh of 165mm.

Extensions: - 24hrs. commencing 18:00 hrs. August 3 in the same
sub-areas except for 4-15 and that portion of 4-12 E. of a line
from Georgy Pt. to Gamble Pt. thence from the western most point
of Croasdaile Is. north to a boundary sign on Smith Is. and E. of
a line from Hicks Pt. north to the flashing light opposite.

- reopen to gn. between 0600h and 2000h August 7th. in
the same boundaries of Area 4 as earlier this week including all
of 4-15 and 4-12. Area 5 remains closed.

CURRENT WEEK MANAGEMENT INFORMATION

- sockeye catches remain strong.
- the test fishery indicates that the desired weekly escapement
for Skeena sockeye will be exceeded.
- for fish quality, processors prefer to fish a maximum of two
days consecutively, followed by a two day closer.
- the steelhead test fishery index is very low at the start of the
week but improves greatly towards the end of the week.
- the coho index is well below minimum level.
- information suggests that the peak of some early run steelhead
into the river will be this week.
- fishery openings and closers should take into account tides to
maximize sockeye harvest.
- other factors such as reducing the catch of steelhead, coho and
attempting to harvesting surplus sockeye makes the sn/gn sockeye
allocation of 24/76 a secondary goal.
- access to the office is restricted on Wed. Thur. and Fri. by
protesting net fishermen.

CURRENT WEEK RECOMMENDATION

The fishing pattern was set by the Regional Office and Ottawa in consultation with sport fishermen, commercial fishermen and the Province.

NEXT WEEK'S RECOMMENDATION

Open Sunday. August 8th for 24hrs. same boundaries and restrictions as this week including 4-15 and all of 4-12.

AREA 4 & 5 WEEKLY MANAGEMENT PLAN

TARGET SPECIES: Skeena River Sockeye
FOR FISHING PERIOD: August 08 to 14/93

MANAGEMENT ACTIONS FOR THE CURRENT WEEK

Management Objectives: To harvest Skeena sockeye.

Date and Time Open: 1800 hrs. August 8th

Anticipated Date and Time Closed: 1800 hrs. August 9th

Subareas Open: To nets, 4-1, 4-2, 4-3 & 4-13
5-1 to 5-3, 5-10 to 5-12 & 5-13 N. of a line from
a boundary sign approx. 1 mile N. of Keswar Pt. in
Principe Ch. to a boundary sign on Banks Island
shore opposite.

To gillnets only, 4-4, 4-5, 4-8, 4-9 & 4-12
(excluding Inverness Pass inside of a line from
Hicks Pt. to the flashing light opposite)

Inverness Pass & 4-15 open to gillnets only from
0400h to 1800 Aug. 9th.

Gear Restrictions: Gn. max. mesh of 165mm.

Extensions: - Area 5 for 24 hrs. commencing 18:00 hrs. August 09,
same boundaries and restrictions.

Reopen to nets for 24hrs. commencing 1800h August 12th. with the
same restrictions and boundaries as at the start of this weeks
fishery including all of 4-15 and 4-12.

CURRENT WEEK MANAGEMENT INFORMATION

- sockeye catches remain strong.
- the desired weekly escapement for Skeena sockeye was exceeded by tuesday.
- for fish quality, processors prefer to fish a maximum of two days consecutively, followed by a two day closer.
- the steelhead test fishery index remains high and is better than last year.
- the coho index is well below minimum level.
- fishery openings and closers should take into account tides to maximize sockeye harvest.
- other factors such as reducing the catch of steelhead, coho and attempting to harvesting surplus sockeye makes the sn/gn sockeye allocation of 24/76 a secondary goal.

CURRENT WEEK RECOMMENDATION

The current management is consistent with the preseason plan of

two days maximum in Area 4 if the coho index is below minimum level.

NEXT WEEK'S RECOMMENDATION

Open Monday August 16th for 24hrs. same boundaries and restrictions as this week including 4-15 and all of 4-12.

AREA 4 AND 5 HAIL DATA

AREA 4 & 5 WEEKLY MANAGEMENT PLAN

TARGET SPECIES: Skeena River Sockeye
FOR FISHING PERIOD: August 15 to 21/93

MANAGEMENT ACTIONS FOR THE CURRENT WEEK

Management Objectives: To harvest Skeena sockeye.

Date and Time Open: 1800 hrs. August 15th

Anticipated Date and Time Closed: 1800 hrs. August 16th

Subareas Open: To nets, 4-1, 4-2, 4-3 & 4-13
5-1 to 5-3, 5-10 to 5-12 & 5-13 N. of a line from
a boundary sign approx. 1 mile N. of Keswar Pt. in
Principe Ch. to a boundary sign on Banks Island
shore opposite.

To gillnets 4-4, 4-5, 4-8, 4-9, 4-12 & 4-15

Gear Restrictions: Gn. max. mesh of 165mm.

Extensions: - None

CURRENT WEEK MANAGEMENT INFORMATION

- sockeye catches & escapements remain strong.
- the steelhead test fishery index remains high and is better than last year.
- the coho test fishery index is very low.
- pink escapements continue below desired levels.
- fishery openings and closers should take into account tides to maximize sockeye harvest.
- other factors such as reducing the catch of steelhead, coho and attempting to harvesting surplus sockeye makes the sn/gn sockeye allocation of 24/76 a secondary goal.

CURRENT WEEK RECOMMENDATION

Close to conserve coho and pink stocks.

NEXT WEEK'S RECOMMENDATION

Open 1800hrs. Sunday, August 22nd for 24hrs. in 4-4, 4-5, 4-8, 4-9, 4-12 & 4-15. 165mm max. mesh. net restrictions. Area 5 and the outside of Area 4 remain closed to conserve coastal pinks.

AREA 4 & 5 WEEKLY MANAGEMENT PLAN

TARGET SPECIES: Skeena River Sockeye
FOR FISHING PERIOD: August 22 to 28/93

MANAGEMENT ACTIONS FOR THE CURRENT WEEK

Management Objectives: To harvest Skeena sockeye.

Date and Time Open: 1800 hrs. August 22nd

Anticipated Date and Time Closed: 1800 hrs. August 23rd

Subareas Open: To gillnets 4-4, 4-5, 4-8, 4-9, 4-12 & 4-15

Gear Restrictions: Gn. max. mesh of 165mm.

Extensions: - None

CURRENT WEEK MANAGEMENT INFORMATION

- sockeye catches & escapements remain strong for this time of year.
- the steelhead test fishery index remains high and is better than last year.
- the coho test fishery index is very low.
- pink escapements improve and the weekly target for the Skeena will likely be exceeded.
- escapements of coastal pinks remain very low.
- fishery openings and closers should take into account tides to maximize sockeye harvest.

CURRENT WEEK RECOMMENDATION

Close to conserve coho and pink stocks.

NEXT WEEK'S RECOMMENDATION

Remain closed to conserve incidental species.

3. Escapement:

| | Sockeye | Coho | Pink | Chum | Chin |
|---------|---------|-------|------------|-------|-------|
| 1993 | 1662576 | 25257 | 7031067337 | 11847 | 68288 |
| Target* | 1072885 | Unk | 2352300 | 88750 | 97710 |

4. Commercial Fishery Stats:

| | Date Of First Fishery | Date Of Last Fishery | Date Of CFB | Total Days Fishing | Total Accum Effort |
|---------|-----------------------|----------------------|-------------|--------------------|--------------------|
| Seine | July 17 | Aug. 16 | Sept. 16 | 12.0 | 400 |
| Gillnet | June 28 | Aug. 23 | Sept. 16 | 22.4 | 11094 |
| Troll | July 01 | Sept. 12 | Sept. 12 | 68 | Unk |

Notes: (*)

- Jack and Steelhead commercial catch information is a low estimate.
- Troll figures are sales slip updates to January 09, 1994 and are still preliminary.
- Sport fish information is incomplete and represents a low estimate of catch.
- ESSR means Excess to Salmon Spawning Requirements. Fish caught in this fishery are for commercial sale.
- The Sockeye target in section (1) represents the management target for the Skeena of 900,000 plus Area 5 biological target. Section (3) target represents the Area 4 and Area 5 biological targets.
- The Pink target in section (1) represents the one million past the test fishery plus the coastal Area 4 and Area 5 biological targets. Section 3 represents the biological targets of Area 4 & 5.
- The Sockeye surplus represents the total returning Skeena and Area 5 stocks to Areas 3, 4 & 5, minus the Area 3 catch of Skeena and Area 5 sockeye, minus the escapement target of 950,500.
- The Pink surplus represents the total Area 4/5 returning stock minus the target escapement of 1,506,350, minus the Area 3 catch of Area 4 stocks.

5. Proposed General Fishing Plan:

1993 SALMON EXPECTATIONS - AREA 4/5

SOCKEYE The Skeena Sockeye return (to Canadian waters) is forecast to be 2,300,000 providing an Area 4 catch of 1,000,000. The Skeena Sockeye fishery is scheduled to begin with gillnets June 28, seines July 18 in Area 5 and July 25 in Area 4. The opening day and fishing pattern within a week may be varied to take advantage of tidal cycles or unexpected variations in abundance. Net fisheries in all of Area 4 will be restricted to a maximum of 2 days per week for the weeks ending August 7 and August 14 unless Skeena coho returns are better than expected.

Fisheries in the area known as the River/Gap/Slough will be restricted to a maximum of 2 days per week for the month of August in an effort to increase Skeena River Steelhead escapements.

In Area 5 a catch of 50,000 Skeena sockeye is expected. Fishing patterns are largely based on the abundance of Skeena Sockeye and Pink.

PINK The Skeena Pink return is expected to be as high as 5.8 million. This is expected to provide an Area 4 catch of up to 2 million, but the effects of floods in the brood year are unknown and could be severe. A gillnet maximum mesh of 121 mm will be implemented beginning in the first week of August.

In Area 5 the catch of local and Skeena Pink is expected to total 400,000.

CHUM Chum catches in both Area 4 & 5 will be incidental to directed Sockeye and Pink fisheries.

PROPOSED FISHING PATTERN:

| Effective Date | Action |
|----------------|--|
| June 28 | Open to gillnets for 24 hours in Subareas 4-1, 4-2, 4-3, 4-4, 4-5, 4-8, 4-9, 4-12, 4-13, 4-14 and 4-15. Max. mesh 137 mm. Open to gillnets for 24 hours in Subareas 5-1, 5-2, 5-3, 5-10, 5-11, 5-12 and 5-13 (north of a line from a boundary sign approximately 1 mile north of Keswar Point in Principe Channel to a boundary sign on the Banks Island shore opposite. Max. mesh size 137 mm. Subsequent gillnet openings dependent on run strength. |
| July 18 | Open to seines and gillnets for 24 hours in Subareas 5-1, 5-2, 5-3, 5-10, 5-11, 5-12 and 5-13 (north of a line from a boundary sign approximately 1 mile north of Keswar Point in Principe Channel to a boundary sign on the Banks Island shore opposite. Min. bunt mesh 70 mm. Max. gillnet mesh size 165 mm. |
| July 25 | Area 4 seine openings to be determined on stock strength. |
| August 2 | Proposed date for Pink salmon management. Max. mesh 121mm. |

6. Commercial Net Fishery Summary:

A summary of catches by for Area 4 and 5 is as follows:

| Area | Gear | Boat Days | Sockeye | Coho | Pink | Chum | Chin |
|------|------|-----------|---------|-------|--------|--------|-------|
| 4 | Gn | 10909 | 1452123 | 34974 | 366546 | 108402 | 13773 |
| 4 | Sn | 329 | 123867 | 3062 | 70378 | 8415 | 1983 |
| 4 | All | 11238 | 1575990 | 38036 | 436924 | 116817 | 15756 |
| 5 | Gn | 185 | 16607 | 2106 | 3652 | 3826 | 115 |
| 5 | Sn | 71 | 19111 | 1928 | 27469 | 4442 | 276 |
| 5 | All | 256 | 35718 | 4034 | 31121 | 8268 | 391 |

6. Commercial Net Fishery Summary Continued:

| | | Boat | Sockeye | Coho | Pink | Chum | Chin |
|------|------|-------|---------|-------|--------|--------|-------|
| Area | Gear | Days | | | | | |
| 4/5 | Gn | 11094 | 1468730 | 37080 | 370198 | 112228 | 13888 |
| 4/5 | Sn | 400 | 142978 | 4990 | 97847 | 12857 | 2259 |
| 4/5 | All | 11494 | 1611708 | 42070 | 125085 | 16147 | 2177 |

As a result of stronger than forecast returns of Skeena Sockeye, changes to the preseason plan were necessary. First, processors expressed a strong desire for no more than 2 consecutive days of fishing without a 2 day break to assist in an effort to maximize fish quality and marketing strategies. Secondly, seine openings were advanced in Areas 3, 4 & 5 to harvest very strong Sockeye returns.

The commercial net fishery opened June 28 to gillnets. 472 vessels participated in the 24 hour fishery. Good catches and a strong Skeena Sockeye escapement (as indicated by the Tyee test fishery) resulted in a 24 hour extension.

The first seine opening was advanced to July 17th in both Area 4 & 5, 8 days earlier in Area 4 and 1 day earlier in Area 5. Seine effort in Area 4 was high in Area 4 (85 vessels) but in the following weeks declined to more normal fleet sizes.

Fishing effort was very aggressive through July in response to strong Sockeye returns. Sportfishing groups viewed the aggressive fisheries and split week openings as being inconsistent with the 3 year plan to reduce the steelhead harvest rate in the commercial fishery by 50%. Exacerbating the situation was a very low Steelhead escapement early in the season. In the end, what proved to be the persistent problem was the low abundance of early Skeena Coho.

During the first week of August, in an attempt to maximize the Skeena Sockeye harvest, but address Steelhead and Coho escapement concerns, sub-areas 4-15 and the Slough/Gap portion of 4-12 closed after the first 24 hours with the rest of the Area extending for an additional 24 hours. This resulted in a strong protest from gillnet fishers.

After extensive consultation and an improvement in Steelhead escapements Area 4 opened to gillnets for an additional 14 hrs. The second week in August remained consistent with the preseason plan of 2 days maximum due to a below minimum escapement of Coho. The troll closure in 102-1 and 104 N of 54 was extended until August 26 to conserve Skeena Coho. The fishery in the 3rd week of August was limited to 24 hours with no extensions because of conservation concerns for, Skeena River Coho, Area 5 Pink and Chum and Area 4 coastal and Skeena River Pink. (It should be noted that because of lower than forecast returns of Pink salmon the 121 mm maximum mesh restriction was never implemented).

Area 4 had one last 24 hour gillnet fishery on August 22 to harvest Skeena Sockeye and thereafter remained closed to conserve Coho and Pink salmon.

The largest number of gillnets operating in Area 4 occurred July 13th with 796. Total number of gillnet days was 22.4 for 10,909 gillnet boat days compared to the 18 year average of 22.3 and 8,994.6 boat days. The largest number of seines operating was July 19th with 109. Total number of seine days was 12 for 329 boat days compared to the 18 year average of 7 days and 275.3 boat days. The total hailed net catch was 1,575,990 Sockeye and 436,924 Pink, exceeding the preseason forecast catch of Sockeye by 575,990 and falling short on the pink catch by more than 1.5 million pieces. The 18 year average catch is 981,132 Sockeye and 951,082 Pink. It is the lowest odd year Pink catch in Area 4 for the last 18 years.

In Area 5 the largest number of vessels operating was, 33 gillnets July 14th and 13 seines July 29th. The total hailed net catch was 35,718 Sockeye and 31,121 Pink below the anticipated catch of 50,000 Sockeye and 400,000 Pink.

The preseason net allocation by gear type for Areas 1,3,4,& 5 was:

Sockeye - 76% gn & 24% sn Pink - 28% gn 72% sn

The inseason results were:

Sockeye - 67% gn & 33% sn Pink - 21% gn & 79% sn

See Appendix I and II for a complete summary of weekly commercial net catches for Area 4 and 5.

7. Excess To Salmon Spawning Requirements (ESSR) Fishery Summary

Historically, excess salmon to spawning requirements (sockeye) have been available on an annual basis in the Skeena River system. For the second year in a row, the 3 major Tribal Groups on the Skeena River were licensed to conduct a pilot sales harvesting program.

Allocations and fishing regimes were negotiated in advance of the season and a formal allocation agreement was drawn up. All harvesting activities under this fishery have to be by selective means as a conservation measure to protect weaker non target species (Coho and Steelhead). Details of the fishery were as follows:

| Tribal Group | Allocation | Fishing Area & Gear |
|--------------------------|-----------------------------|---|
| Tsimshian Tribal Council | 50,000 Sock. 95,000 Pink | Skeena River (Mowitch Pt. Lorne Creek). Harvest method: dipnet, beach seine or weir. |
| Gitksan Wet'sutwet'en | 50,000 Sock. | Skeena & Babine River |

75,000 Pink (Lorne Creek to Kitsegas)
Harvest method: traps,
trap nets, beach seines,
fishwheel, dipnet or
weirs.

Nat'oot'en *150,000 Sock. Babine R. Counting Fence
** 5,000 Sock. Fulton River (mouth).
Harvest method: beach
seine and dipnet.

Notes:

* Nat'oot'en were entitled to harvest 50,000 for their exclusive use; the remaining 100,000 had to be shared with the other 2 tribal groups.

** Fish caught by the Nat'oot'en at the Fulton River were processed to investigate the feasibility of canning and marketing fish at this site. Initial indications are that a grade A late color and odor canned product can be produced, which is suitable for some markets.

Although their operations showed significant improvement over 1992, both the Tsimshian and the Gitksan Wet'sutwet'en had difficulty in harvesting their total allocations. The Nat'oot'en had no difficulty in harvesting their allocation at either site. Discussions are still ongoing regarding the sharing arrangement for additional fish harvested at the Babine River fence. The Nat'oot'en also conducted their Jack fishery as they have for the past several years.

A summary of ESSR catches are as follows:

| Tribal Group | Sockeye Harvest | Pink Harvest |
|--------------------------|--|--------------|
| Tsimshian Tribal Council | 3,750 | 2,020 |
| Gitksan Wet'sutwet'en | 25,476 | 0 |
| Nat'oot'en | 104,340 (Babine Fence) 4,232 (Fulton River) | N/A N/A |

8. Sport Fishery Summary:

Tidal:

The majority of the effort and catch is during the months of June, July and August, a consequence of chinook run timing and fishable weather. Three main derbies were held again this year, sponsored by Solly's Pub, Royal Canadian Legion, and the RCMP; two in June and one in April. Information from six charter operators were received via this years logbook program; Driftwood Ventures, Mount Hays Charters Ltd., Glory Hole Charters, Northwest Sportsman, Charbonneau Enterprises Ltd. and Shaman II. Additional information from the non guided fishery was compiled from hauls taken by

patrolmen, DFO ships crew and Fishery Officers.

See Appendix III and IV for a more detailed summary of tidal water sport fish catches for Area 4 and 5.

Non Tidal:

A summary of catch information as compiled by Fishery Officers and Guardians is as follows:

| Area | Coho | Pink | Chinook |
|---|------|----------------|---------|
| <hr/> | | | |
| Area 4 Waterfront | 0 | 0 | 12 |
| <hr/> | | | |
| Terrace | | | |
| - Kalum River | 0 | 0 | 200 |
| - Skeena Mainstem | 0 | 0 | 4500 |
| - Lakelse, Kasiks, Exchamsiks, Gitnadoix, Exstew & Zimacord R. | 3500 | 0 | 0 |
| <hr/> | | | |
| Hazelton | | | |
| - Bulkley River | 0 | 75 | 100 |
| - Skeena River Mainstem | 0 | 300 | 250 |
| - Kispiox River | 0 | 200 | 1000 |
| <hr/> | | | |
| Smithers | | | |
| - Morice River | 0 | 50 | 70 |
| - Bulkley River | 20 | 250 | 700 |
| - Babine River | | No information | |
| - Bear/Sustut River | | No information | |
| <hr/> | | | |
| Totals | 3520 | 875 | 6832 |

Note: Information is incomplete and catches are low estimates.

A narrative summary of these fisheries is as follows:

Area 4/Waterfront:

Ecstall River - Patrolled by a guardian from July 16th to August 10th. Participates in the fishery included Komahan Lodge with 23 clients and 27 other non guided fishermen. Total catch was 12 chinook killed and 58 released.

Terrace

Kalum River(early) - 200 chinook killed.

Mainstem Skeena River - 4500 chinook killed

Lakelse, Kasiks, Exchamsiks, Gitnadoix, Exstew & Zimacord Rivers - 3500 coho killed.

Hazelton

Bulkley River - Estimate 100 chinook and 75 pink killed. Most of the effort for chinook was near China Creek and Rainbow Ranch

areas. Most pinks were caught at the mouth of Porphyry Creek.

Skeena River - Estimate 250 chinook and 300 pink killed. Most of the effort was at the mouth of the Kitwanga River. No recorded sockeye catch.

Kispiox River - Estimate 1000 chinook and 200 pink. Most of the effort was at the mouth of the river.

Smithers

Morice River - Estimate 600 rod days for 70 chinook and 50 pink.

Bulkley River - Estimate 1200 rod days for 700 chinook, 20 coho and 250 pink.

Babine River - No information.

Bear/Sustut - No information.

See Appendix II for a more detailed summary of catches.

9. Native Food, Social and Ceremonial Fishery Summary:

There are four main Tribal Groups and Bands that fish for Food, Social and Ceremonial purposes in Area 4. These are:

a) The Tsimshian Tribal Council (TTC). Member bands are Lax Kwalaams (Port Simpson), Metlakata, Kitkatla, Prince Rupert, Kitsum Kalum and Kitselas. The Hartley Bay and Kitasoo Bands also belong to the TTC, but do not fish in Area 4.

b) Gitksan Wet'Sutwet'en (GWWA). This group is generally split up into Lower Skeena, Upper Skeena, Moricetown and Gitanyow Bands.

c) Nat'oot'en. The main bands associated with this group are Lake Babine, Fort Babine and Burns Lake.

Fishing activities were conducted in much the same fashion and locations as in past years. The major difference for 1993 is that all bands were licensed to fish through a communal fishing licence and specific allocations of each salmon species were mutually agreed to. All bands were responsible for designating fishers as well as gathering and reporting catch information to DFO.

Appendix V gives a summary of catch information by Tribal Groups and Bands for Area 4. Appendix VI and VII give a more detailed weekly summary of catches by band.

10. Escapement Summary:

AREA 4

Sockeye

The test fishery index was 1272.95* compared to the 13 year (1980 to 92) average of 1469.86.

The total recorded escapement is 1,629,426 compared to the 13 year average of 1,208,195(1980 to 92), the stream target of (1,022,385) and management target of 900,000. 1,737,426 sockeye were counted past the Babine River fence of which 177,590 were harvested as ESSR or Native food fish. The enhanced runs were above target. Of the 72 non-enhanced runs, 9 were at or above target, 31 were below target and 32 were not monitored in 1993.

Coho

Early timing coho stocks to the Skeena River returned in the poorest numbers on record (as indicated by the Tyee Test Fishery Index). The test fishery index was 13.3* compared to the 13 year (1980 to 92) average of 53.69 and below the red line of 35.5. The test fishery in 1993 ended September 9th with an overall index of 25.08. Fishing success in the fall suggested that later timed runs may be strong, however stream inspections revealed below average escapements.

Pink

The test fishery index was 322.22* compared to the 1981 to 91 average of 1345.5

The total recorded escapement is 664,231 compared to the odd year average between 1981 and 91 of 3,082,134 and stream escapement target of 1,907,695 and management target of 1 million.

Chum

The test fishery index was 57.0* compared to the 13 year (1980 to 1992) average of 52.95. At the end of the test fishery (September 9th), the index was 73.15.

The total recorded escapement is 10,052 compared to the 1980 to 1992 average of 13,088 and stream target of 54,900. However it should be noted that the escapement to the Ecstall River (Area 4's single largest stock) is unknown for this year.

Chinook

The test fishery index was 260.0 the highest recorded index since the start of the test fishery in 1956. The 1980 to 1992 average is 178.65.

The total recorded escapement is 68,286 compared to the 1980 to 1992 average of 45,870 and the target 99,610. 1959 and 1988 are the only years with higher recorded escapements.

Although escapements have greatly improved over the last 9 years

conservation concerns still exist for some stocks, mainly coastal stocks, some Terrace area stocks and Babine area stocks.

Steelhead

The test fishery index was 45.02* compared to the 1990's average of 47.5 and the 1980's average of 102.42.

Note: * Denotes that Tyee Test Fishery indices are all compared to August 24th dates because in some years that is when the fishery ended.

AREA 5

Sockeye

The total recorded escapement is 33,150 compared to the 1980 to 1992 average of 22,169 and the target escapement of 50,500.

Coho

Escapement information is inadequate to show any trends.

Pink

The total recorded escapement is 39,475 compared to the 1981 to 91 odd year average of 125,939 and target escapement of 254,500. This is the lowest recorded escapement since 1969.

Chum

The total recorded escapement is 1795 compared to the 1980 to 1992 average of 7,402 and the target escapement of 29,850

See Appendix VIII and IX for a summary of escapements by stream for Area 4 and 5.

11. Current Year/Target Escapement Comparison - Key Streams:

AREA 4

Sockeye Salmon

| Key Stream | Target Escapement | Current Year Escapement | % Of Target |
|---------------------|----------------------|----------------------------|-------------|
| Babine River | 200,000 | 490,000 | 245 |
| Club Creeks | 6,000 | 9,000 | 150 |
| Fulton R. & Channel | 220,000 | 387,429 | 176 |
| Morrison Creek | 20,000 | 6,000 | 30 |
| Pierre Creek | 25,000 | Unknown | N/A |
| Pinkut Ck. & Ch. | 130,000 | 374,693 | 288 |
| Shawatian Creek | 5,000 | 1,000 | 20 |
| Southend Creek | 15,000 | 3,500 | 23 |
| Williams Creek | 15,000 | 1,250 | 8 |

Pink Salmon

| Key Stream | Target Escapement | Current Year Escapement | % Of Target |
|------------------|-------------------|-------------------------|-------------|
| Babine River | 150,000 | 45,700 | 31 |
| Kispiox River | 200,000 | 8,000 | 4 |
| Kitwanga River | 250,000 | 50,000 | 20 |
| La Hou Creek | 25,000 | 2,000 | 8 |
| Lakelse River | 500,000 | 250,000 | 50 |
| Moore Cove Creek | 75,000 | 15,000 | 20 |

**NOTICE TO COMMERCIAL
NET FISHERMEN**

**1993 SKEENA RIVER STEELHEAD
CATCH AND RELEASE PROGRAM**

AREAS 3 - 4 - 5

I. INTRODUCTION

The steelhead catch and release program initiated in Area 4 (Skeena River and approach waters) during the 1992 fishing season showed promise as a tool in attempting to reduce the harvest rate of steelhead by the commercial net sector. The Department of Fisheries and Oceans, working in cooperation with the provincial Ministry of Environment and other resource sectors is committed to reducing the harvest rate of Skeena River steelhead by the Canadian commercial net fleet by 50% by 1994. The 1993 season will be the second year of the program. The catch and release program is being expanded to include Areas 3 and 5 for this season, as some steelhead harvested in these areas as by-catch by commercial net fishermen are destined for the Skeena River and other systems.

The 1993 program will involve both catch and release directly from commercial fishing vessels, and a steelhead retrieval program in the Skeena River and immediate approach waters. Commercial net fishers are requested to fish their gear in a manner that will absolutely minimize the mortality of steelhead caught as by catch. Fishers are requested to handle captured steelhead with the utmost of care and make all reasonable attempts to revive fish that are in poor condition prior to release. It is hoped that by retrieving nets on a frequent basis and careful handling of steelhead caught, mortality can be minimized, allowing for increased numbers of fish to migrate to the spawning areas in the Skeena River watershed.

PLEASE READ THIS REPORT IN ITS ENTIRETY TO FAMILIARIZE YOURSELF WITH THE PROGRAM AND CLEARLY UNDERSTAND YOUR INVOLVEMENT AND OBLIGATIONS.

II. CONDITIONS OF 1993 SALMON LICENCE

Commercial net fishers wishing to fish in Areas 3, 4 and 5 are required to have on board their vessels a "steelhead revival" tank equipped with apparatus that will provide for continual circulation of sea water. The steelhead revival tank must meet the following requirements:

1. Construction must be of an opaque material;
2. Dimensions of the tank must be at least 90 cm x 40 cm x 40 cm. Tanks smaller than these dimensions will not be permitted;
3. Tank must have a tight fitting lid; and
4. Tank must be equipped with a pump capable of delivering an adequate supply of water to the tank.

The tank must be filled with water and there must be a constant exchange of sea water at any time the vessel is fishing within Areas 3, 4 and 5.

This tank is intended to revive and hold steelhead caught by commercial fishers in these areas.

The above noted licence requirement is noted in the document entitled "Appendix B" attached to this report.

III. THE CATCH AND RELEASE PROGRAM - INSTRUCTIONS

The steelhead catch and release program is divided into two areas. These areas are as follows:

- A. Commercial fishers fishing in the steelhead retrieval area (Appendix A) within Area 4;
- B. Commercial fishers fishing in Areas 3 and 5 and those portions of Area 4 outside of the steelhead retrieval area.

A.

Area 4 - Steelhead Retrieval Area

If you are fishing within the highlighted portion of Area 4 indicated in the attachment - "Appendix A", any steelhead you catch that are salvageable and held in your revival tank will be collected by individuals working on fast retrieval boats. The fish you catch will be held in a large holding tank facility, and tagged and released at the end of each weeks commercial fishing opening.

If you are fishing in the "steelhead retrieval area", and catch a steelhead, please follow these instructions:

1. Carefully remove the steelhead from your net ensuring that you do not damage gills or crush body organs (Note: it may be necessary to cut some meshes of the gillnet to remove the fish without causing damage);
2. Carefully place the steelhead in your revival tank and ensure that an adequate supply of sea water is circulating in the tank;
3. Secure the lid on your revival tank firmly so that a lively fish cannot dislodge the cover;
4. Call the steelhead recovery dispatcher on VHF Channel 19A, and advise the dispatcher as to your location, name and description of vessel. Advise the dispatcher as to the condition of the fish. It may be wise to allow the fish time to revive in your revival tank before pickup by the retrieval boat, if the fish appears to be in poor condition. If the fish is definitely dead, advise the dispatcher accordingly.

NOTE: Place all steelhead in the revival tank even if they appear to have expired. In 1992, fishers noted that steelhead which appeared to be dead upon retrieval from the net, at times eventually recovered in the revival tanks. These fish are much hardier and tougher than some people might think.

5. The dispatcher will send a retrieval boat to your vessel and collect the fish for transport and holding in a large fish holding facility anchored near the mouth of the Skeena River.
6. Assist the retrieval boat skipper in transferring the fish from your boat to his boat if water conditions are rough.

NOTE: Steelhead can be held in the revival tank for several hours if an adequate supply of circulating sea water is pumped through your tank. Depending on a variety of circumstances, it may be several hours before a retrieval boat can reach you so please make all effort to ensure that your steelhead is properly cared for.

7. Your fish will be tagged and released from the primary holding facility at the end of each week's fishing time at a location upstream of the upper river fishing boundary.

B.

Areas 3, 4, 5 - Waters outside of steelhead retrieval areas

If you are fishing in waters outside of the areas identified as "steelhead retrieval waters" and catch a steelhead, proceed as follows:

1. Carefully remove the steelhead from your gillnet, cutting a few net strands if necessary to ensure that you do not damage gills or body parts (internal organs);
2. If you are fishing from a seine, consideration should be given to separating steelhead from the remainder of your catch by brailing, if your vessel is not equipped with a hydraulic stern ramp;
3. If the fish is in a very lively state, release it back into the water in a manner that will not cause injury or possible death;
4. If the fish appears to be in poor condition or badly stressed, place it in the revival tank ensuring that there is an adequate supply of circulating sea water to the tank;
5. Allow sufficient time for the fish to fully revive, then release carefully back into the water (Note: fish that appear expired or in very poor condition may revive if placed in the tank for a sufficient period of time);

6. If you are fishing very near the steelhead retrieval area and intend to move into the area within a few hours of catching your fish, you may wish to hold your live fish on board and have a collector boat retrieve the fish. If such is the case, call the steelhead dispatcher on VHF Channel 19A when you move into the retrieval area and a retrieval boat will collect your fish.

IV. HAIL DATA

A random sample of commercial fishing boats will be approached by DFO Fishery Officers intent on collecting on grounds harvest data. Please cooperate fully with these Officers and provide accurate information respecting fish caught, including steelhead. Advise the Officers as to how many steelhead were released alive back into the water, and how many steelhead have been retained in your fish hold due to mortality. Accurate harvest data is essential in effectively managing fish stocks.

V. TAGGING

Consideration is being given to implementing a limited tagging program for steelhead for the 1993 season. A selected number of commercial net fishers may be supplied with fish tagging equipment to be used in tagging steelhead released from commercial vessels. Only those vessels fishing outside of the "steelhead retrieval area" will be considered for tagging purposes, as those fish captured in the retrieval area will be tagged by the retrieval boat staff. The final decision pertaining to the tagging program is pending, but if you wish to become involved in this program, contact the following individuals:

| Mr. Des Nobles | Tel: 627-1859 |
| Mr. Rick Haugon | Tel: 624-5188 |

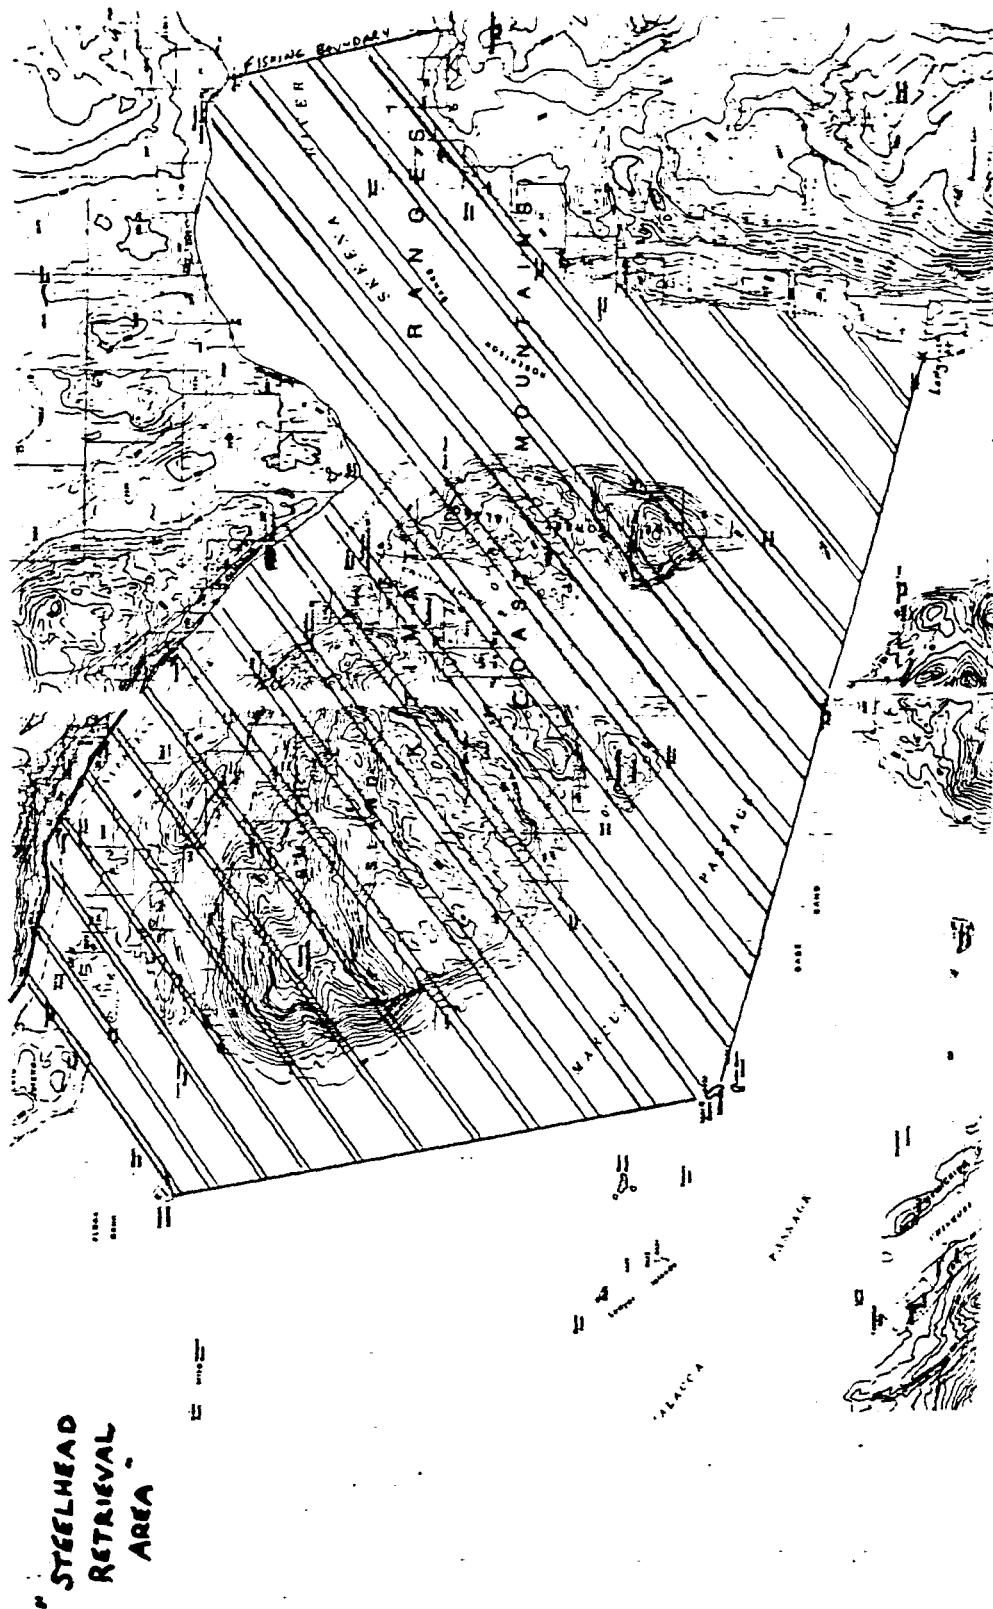

VI. CONCLUSION

The steelhead catch and release program is a diligent effort on the part of commercial net fishers to address the issue of steelhead by-catch by the net fleet. Steelhead by-catch mortality can be reduced if certain fishing practices are followed. Check your net frequently so that steelhead mortality through net injury or drowning is minimized. Make sets away from areas known to hold significant numbers of steelhead to reduce the degree of by-catch encountered. Encourage cooperation of all fishermen to not fish in known areas of concentration. Active cooperation of commercial net fishers in the steelhead program will ultimately benefit the steelhead stocks for the future.

If you have any questions relating to the 1993 steelhead catch and release program, please contact either of the following people:

CONDITIONS OF 1993 SALMON LICENCE FOR AREAS 3, 4 AND 5

(These conditions provide for the Skeena River Steelhead Conservation Project in Areas 3, 4 and 5)

Vessels participating in a salmon net fishery in Areas 3, 4 or 5 must be equipped with a tank meeting the following requirements:

1. Construction of opaque material,
2. Minimum dimensions of 90cm x 40cm x 40cm,
3. A tight fitting lid,
4. A pump capable of delivering water to the tank.

The tank must be filled with water and there must be a constant exchange of sea water at any time the vessel is fishing or transporting live steelhead within Areas 3, 4 or 5.

This tank is intended to revive and hold steelhead caught by fishers in these areas.

May 10, 1993

 Fisheries and Oceans Pêches et Océans

Canada

Overwintering Conditions Area 4/5 93/94

The fall of 1993 was very dry, which delayed the migration of stocks and cause some prespawning mortality in coastal Area 4 and Area 5 streams. No, heavy rains resulting in extensive stream coarse changes was observed. The winter on the coast was mild with moderate precipitation. The interior had some cold weather but nothing out of the ordinary. Overall weather conditions should have been conducive to average or better than average salmon spawn survival.
