Appendix V - 1991 Babine Fence Counts.....	125
Appendix VI - Area 4 Trends and Averages.....	137

NOTE: COTHO ESCAPEMENT NUMBERS ARE PRELIMINARY.

AREA 4
SKEENA

(a) Area 4

Comprising those waters bounded inside a line commencing at the southern most point of Dundas Island, thence true west to Prince Leboo Island, thence southerly along the shoreline to the southern most point, thence true west to the surfline, thence southerly following the surfline to a point true west of Cape George on Porcher Island, thence true east to Cape George, thence following the western, northern then eastern shoreline to Peninsula Point, thence to the northern most point of Gibson Island, thence to Buckley Point on the mainland, thence following the shoreline northerly to a marker approximately one and one half miles easterly of Vietch Point, thence across the Skeena River to a marker near Mowitch Point, thence north westerly along the shoreline to Redcliffe Point, thence to Duncan Point on Finlayson Island, thence northerly along the shoreline to Gordon Point, thence to Green Island Light, thence magnetic west to a marker on the easterly shore of Dundas Island, thence southerly along the shoreline to the point of commencement.

(b) Area 4 is composed of Subareas as follows:

Subarea 4-1

Those waters of Hudson Bay Passage, Brown Passage, and adjacent waters inside a line from the southern most point of Dundas Island true west to Prince Leboo Island, thence southerly along the shoreline to the southern most point of Prince Leboo Island, thence true west to the surfline, thence southerly along the surfline to Butterworth Rocks light, thence in a straight line to Triple Islands light, thence to Deans Point on Melville Island, thence northerly along the shoreline to the northeastern most point of Melville Island, thence to the southeastern most point of Dunira Island, thence northerly along the eastern shoreline to the northern most point of Dunira Island, thence true west to Baron Island, thence northerly along the shoreline to the northern most point of Baron Island, thence true north to Dundas Island; thence southwesterly along the shoreline to the point of commencement.

Subarea 4-2

Those waters of Hecate Strait, Edye Passage and adjacent waters inside a line from Butterworth Rocks light, thence southerly along the surfline to a point true west of Seal Rocks light, thence true east to Seal Rocks light, thence to Welcome Point on Porcher Island, thence northerly along the shoreline to Edwin Point, thence to View Point on Arthur Island, thence easterly along the shoreline to the easternmost point of Arthur Island, thence to Morrell Point on Prescott Island, thence northerly along the shoreline to a marker at Stephens Passage, thence across the passage to a marker on Stephens Island, thence northerly along the shoreline to Riel Point, thence to the easternmost point of Avery Island, thence northerly along the shoreline to the northwesternmost point, thence to Harris Rock, thence to the point of commencement.

Subarea 4-3

Those waters of Hecate Strait and adjacent waters inside a line from Welcome Point on Porcher Island to Seal Rocks light, thence true west to the surfline, thence southerly along the surfline to a point true west of Cape George on Porcher Island, thence true east to Cape George, thence along the shoreline to the point of commencement.

Subarea 4-4

Those waters of Edye Pass and adjacent waters inside a line from Pearce Point on Porcher Island to Morrell Point on Prescott Island, thence to the eastern most point of Arthur Island, thence westerly along the shoreline to View Point, thence to Edwin Point on Porcher Island.

Subarea 4-5

Those waters of Chatham Sound and adjacent waters inside a line from Ryan Point on the mainland to Deans Point on Melville Island, thence northerly along the shoreline to the northeasternmost point, thence to the southeasternmost point of Dunira Island, thence northerly along the eastern shoreline to the northernmost point, thence true west to Baron Island, thence northerly along the easterly shoreline to the northernmost point, thence true north to Dundas Island, thence northeasterly along the shoreline to a marker true west of the light on Green Island, thence to the light on Green Island, thence to Gordon Point on Finlayson Island, thence along the westerly shoreline to a marker on Fortune Point, thence to the northernmost point of Misti Island, thence following the easterly shoreline to the southernmost point, thence to the northernmost point of Burnt Cliff Island, thence easterly and southerly along the shoreline to the southernmost point, thence to the northernmost point of South Island, thence along the easterly shoreline to the southernmost point, thence to Trenham Point on Tsimpsean Peninsula, thence to the point of commencement.

Subarea 4-6

Those waters of Pearl Harbour and adjacent waters inside a line from Pearl Point on Tsimpsean Peninsula to Cultivation Point on Burnt Cliff Island, thence westerly along the shoreline to the northernmost point, thence to the southernmost point of Misti Island, thence following the easterly shoreline to the northernmost point, thence to the westernmost Island of Flat Top Islands, thence to the easternmost point of Green Mound, thence true east to a marker on Tsimpsean Peninsula.

(a)

Subarea 4-7

Those waters of Big Bay and adjacent waters inside a line from Pearl Point on Tsimpsean Peninsula to Cultivation Point on Burnt Cliff Island, thence along the easterly shoreline to the southern most point of Burnt Cliff Island, thence to the northern most point of South Island, thence along the easterly shoreline to the southern most point of South Island, thence to the southern most point of Haycock Island, thence to Whitecliff Island, thence to Shattock Point on Tsimpsean Peninsula.

Subarea 4-8

Those waters of Big Bay and adjacent waters inside a line from Trenham Point on Tsimpsean Peninsula to the southern most point of South Island, thence to the southern most point of Haycock Island, thence in a straight line to Whitecliff Island, thence to Shattock Point on Tsimpsean Peninsula.

Subarea 4-9

Those waters of Chatham Sound and adjacent waters inside a line from Deans Point on Melville Island east to Ryan Point on the mainland, thence southerly along the shoreline to Observation Point, thence to Straith Point on Digby Island, thence along the westerly shoreline to Lima Point, thence to Hunt Point on Porcher Island, thence westerly along the shoreline to Pearce Point, thence to Morrell Point on Prescott Island, thence along the easterly shoreline to a marker at Stephens Passage, thence to a marker on Stephens Island opposite, thence northerly along the shoreline to Riel Point, thence to the eastern most point of Avery Island, thence northerly along the shoreline to the northwestern most point of Avery Island, thence to Harris Rock, thence to Deans Point on Melville Island.

Subarea 4-10

Those waters of Prince Rupert Harbour and adjacent waters bounded on the west by a line from Straith Point on Digby Island to Observation Point on the mainland and bounded on the south by a line from Lima Point on Digby Island to the southern most point of Kaien Island, thence along the northwesterly shoreline to Ritchie Point, thence to Pethick Point on Tsimpsean Peninsula.

Subarea 4-11

Those waters of Porpoise Harbour, Wainwright Basin, Morse Bay, and adjacent waters inside a line from the southern most point of Kaien Island to the northwestern most point of Ridley Island, thence southerly along the eastern shoreline to the southern most point of Ridley Island, thence to the western most point of Lelu Island, thence northerly along the shoreline to the northern most point of Lelu Island, thence to a marker on the shore of Tsimpsean Peninsula opposite; and bounded on the north by a line from Pethick Point to Richie Point on Kaien Island.

Subarea 4-12

Those waters of Chatham Sound and adjacent waters inside a line from Hunt Point on Porcher Island thence to Lima Point on Digby Island, thence to the southernmost point of Kaien Island, thence to the northwesternmost point of Ridley Island, thence southerly along the shoreline to the southernmost point, thence to the westernmost point of Lelu Island, thence northerly along the shoreline to the northernmost point of Lelu Island, thence true east to a marker on the shore of Tsimpsean Peninsula, thence southeasterly along the shoreline to Gust Point, thence to Clara Point on De Horsey Island, thence southerly along the eastern shoreline to Parry Point, thence to the navigation light on Marked Tree Bluff on Kennedy Island, thence southerly along the shoreline to a marker true west of Inrig Point on the mainland, thence to Inrig Point, thence northerly along the shore to Buckley Point, thence to the northernmost point of Gibson Island, thence to Peninsula Point on Porcher Island, thence northerly along the eastern shoreline to the point of commencement.

Subarea 4-13

Those waters of Brown Passage and adjacent waters inside a line from Deans Point on Melville Island, thence to Triple Islands Light, thence to Butterworth Rocks light, thence to Harris Rock, thence to the point of commencement.

Subarea 4-14

Those waters of Cunningham Passage and adjacent waters inside a line from Redcliff Point on the mainland, thence to Duncan Point on Finlayson Island, thence southerly along the shoreline to Fortune Point, thence to the northernmost point of Mist Island, thence to the westernmost Island of Flat Top Islands, thence to the easternmost point of Green Mound, thence true east to a marker on Tsimpsean Peninsula, thence to the point of commencement.

Subarea 4-15

Those waters of Telegraph Passage and adjacent waters inside a line from Mowitch Point on Tsimpsean Peninsula, thence westerly along the shoreline to Gust Point, thence to Clara Point on De Horsey Island, thence southerly along the eastern shoreline to Parry Point, thence to the navigation light at Marked Tree Bluff on Kennedy Island, thence southerly along the shoreline to a marker true west of Inrig Point on the mainland, thence to Inrig Point, thence northerly along the shoreline to a marker approximately one and one half miles easterly of Veitch Point, thence to the point of commencement.

STAFF AND MANAGEMENT RESOURCES

District Supervisor: Robb Wilson

Assistant Supervisor: Vacant

Fishery Officer i/c: David Einarson

Salmon Biologist: Les Jantz

Charter Patrolmen:

<u>Vessel (Operator)</u>	<u>+ Start</u>	<u>+ End</u>	<u>+days</u>	<u>Cost/day</u>	<u>Total</u>
Princeton I (D. Lewis)	+ July 05	+ October 21	+ 90	+ \$330.	+\$31,350
Zona G (Jim Gale)	+ June 22	+ September 19	+ 80	+ \$250.	+\$20,000
Sundancer (D. Rowse)	+ June 30	+ August 15	+ 35	+ \$285.	+\$ 9,975
Ken Seymour (Ecstall River guardian)	+ July 15	+ August 18	+ 35	+ \$210.	+\$ 7,350

Patrol Vessels:

<u>Vessel (Operator)</u>	<u>+ Start</u>	<u>+ End</u>
Petrel Rock (J. Heintz)	+ June 3	+ November 8
Kitimat II (M. Calley)	+ July 1	+ August 7

Aircraft:

Eight gear flights, average 2.5 hrs. (20 hrs.) = \$6900.
One helicopter flight of Ecstall River, 2.5 hrs. = \$1800.

Other:

Gillnet test fishery at Tyee - June 10 to September 2 (Management Biology Department).

Babine Lake counting fence (Management Biology Department).

Prince Rupert W/F, Terrace, Hazelton, and Smithers sub-districts, which supply sport and food fish catches and escapement information.

Gillnet weed-line study conducted this year in Area 4, involving 6 gillnets fishing during July and August with nets of varying weed-line depths. This study was handled by Management Biology.

SEP staff, which look after the enhancement facilities on the Skeena system, and are increasingly getting involved in escapement estimation, such as the work done at the Toboggan Creek fence and Kalum River dead pitch.

Totals

Charter Patrolmen ----- \$68,675.
Gear flights ----- 6,900.
Enumeration flights ---- 1,800.
O & M ----- 6,000.

Total ----- 83,375.

Adequacy of Resources

Overtime - This year our overtime budget was reduced drastically. Area 4 went from a summer (salmon) overtime budget of \$7000 in 1990 to \$4000 in 1991. This amount is inadequate to properly manage the area. Coupled to this decrease was the lack of any Fishery Officer or Guardian to help out, making many tasks impossible to complete.

Personnel - Area 4 needs a GT-02 Fishery Officer. With the surge in effort of minor fisheries, such as shellfish dive fisheries, there is fishing activity in Area 4 year-round. Native, sport, and commercial fisheries now operate in Area 4 every week of the year. One person cannot adequately monitor and enforce these fisheries. With one of the largest commercial salmon fisheries on the coast, with effort ranging up to 900 gillnet vessels operating at one time, it is ludicrous not to have a permanent GT-02, when other sub-districts with much less happening do have one. As an example, this year two nets were seized due to their being overlength. Immediately after these incidents, many nets were observed that had been cut off, to reduce them to a legal size. With the lack of enforcement personnel on the grounds, this type of abuse will continue.

In 1991, area 4 did not even have the services of a Guardian during the salmon season. Consequently, some things just could not be done. Important things such as routine maintenance of equipment and even a mere presence on the grounds had to suffer due to the situation.

Patrol Vessels - Efficiency of Patrol Vessel operations were increased tremendously this year by having a skipper and crew that stayed for the entire season. They were also highly motivated and did a professional job on the grounds, when many times a Fishery Officer was unavailable.

The Petrel Rock is not an adequate vessel for this area. The small size of the vessel results in no bunks for the Fishery Officer (they have to sleep on the table), no area for paper-work, and no hot water. It is very awkward to do any computer work, which is becoming increasingly important every year. At the present time, computer work sometimes gets completed with the computer balancing precariously on the starboard seat, with the Fishery Officer standing beside it. 110-volt capacity is now available, but is difficult to hook up, and there is no place to leave the computer to re-charge the batteries. Also, when the weather turns foul, the Petrel Rock must stay in protected waters, while the fleet continue to fish.

Charter Patrolmen - The number of charter patrolmen this year dropped again to three (from four last year), and charter patrol days were 205, compared to 224 last year and 232 that the Operational Framework recommends. Even with the 19 less days, cost of the charters went from \$58,400 in 1990 to \$61,325 in 1991. This

is an increase of \$2925. Thus, for an 8.5% decrease in days, we payed 5% more. The following chart illustrates the change in charter patrol costs in recent years.

Year	Charter Patrol Days	Cost
1991.....	205.....	\$61,325
1990.....	224.....	\$58,400
1989.....	176.....	\$39,500
1988.....	181.....	\$40,750
1987.....	143	
1986.....	155	
1985.....	186	

Funding - Funding for the sub-district comes from a variety of sources. The sub-district O & M budget this year was \$6000. No fault can be found with the amount of operational funding in the area this year.

Enforcement - Resources this year to properly carry out enforcement duties were inadequate. Additional help is needed, in the form of another Fishery Officer or a Guardian, to properly carry out enforcement duties in Area 4.

Capital Acquisitions - Area 4 needs a new outboard motor for the Kaien Isle. The motor presently on the boat, a 60HP Mercury, is four years old, and has been used for many hours. It is presently experiencing major problems, and should be replaced.

ENFORCEMENT SUMMARY

The following is the 1991 summary of the charges and warnings laid in Area 4 relating to salmon.

Commercial: Fish in closed area.....\$500.
 Use gillnet while anchored.....\$100.
 Net on drum and net in water.....Warning
 Overlength gillnet - two charges.....\$1000. each
 and forfeit of all fish. Nets were returned.
 No PCFL.....Absolute Discharge
 Keep prohibited species.....\$250.

IFF: No charges

Sport: Fail to record chinook - 4 charges...\$200.
 Fish without tidal licence.....\$ 50.

The above list resulted in 11 fishermen charged and one warned.

Enforcement patrols were very limited in 1991 due to the lack of a second officer in the Area. Infractions were discovered mainly during haul gathering activity.

An increased enforcement presence is required on the grounds during fisheries. An example is the two overlength gillnets discovered. After these nets were seized, there were numerous nets observed that had been reduced in length to comply with the regulations. Another example is the many complaints received about boats over the upper boundary of the Skeena River. One charge was laid.

1991 FISHING PLANS - AREA 4 - LOWER SKEENA

SPECIES	CYCLE YEAR	CYCLE YEAR CATCH	CYCLE YEAR ESCAPEMENT	EXPECTED ESCAPEMENT	ESCAPEMENT TARGET	EXPECTED CATCH	COMMENTS
Sockeye	1986	497,000	713,000	1,150,000	1,000,000	750,000	An average return is expected totalling 2.1 million.
	1987	510,000	1,328,000				
Pink	1989	1,057,000	4,673,000	1,050,000	1,000,000 to 3,000,000	2,000,000 to 3,000,000	A well above average return is expected totalling 5.8 M.
Chum	1987	23,000	8,000	10,000	50,000	50,000	No surplus expected. Chum catch is incidental.

PROPOSED FISHING PATTERN

Effective Date Action

July 1 Open to gillnet weekly with sub-areas and fishing duration dependant on stock strength

1
2

July 14 Open to seines, dependant on stock strength and domestic allocations

August Fishing times dependant on stock strengths, particularly coho strength.

Note: Gillnet maximum mesh size of 137mm prior to August 4.

Maximum of 4 days fishing per week prior to August 4.

Commencing August 4 fisheries will be designed to conserve coho and minimize surplus escapements of sockeye and pinks.

Trolling restricted to net fishing times and areas..

LONG TERM SALMON ALLOCATION PLAN

YEAR	1991	1992	1993	1994
------	------	------	------	------

NORTH COAST

PINKS TROLL

Area 1

Fishery will be managed in accordance with the Pacific Salmon Treaty. The Area 1 Pink troll catch for the four year period 1990-1993 will be limited to a total of 5.125 million. The maximum harvest in Area 1 in any one year is 1.95 million, of which no more than 300,000 can be taken in the A-B line sub-areas.

Areas 2 - 10

Troll catch ceiling of 4% of the all gear catch in Areas 2-10, excluding Fraser River Pinks.

NET

Areas 1,3,4 & 5

GN 28% of net	GN 22% of net	GN 28% of net	GN 22% of net
SN 72% of net	SN 78% of net	SN 72% of net	SN 78% of net

Areas 6 to 10

Maintain traditional fishing patterns with the primary objective to harvest available surpluses and ensure that escapement goals are met.

SOCKEYE TROLL

Areas 1,3,4 & 5

Troll catch to remain incidental and not to exceed 5% of the total catch.

Areas 6 to 10

The troll fishery on sockeye in these areas should not escalate.

NET

Areas 1,3,4 & 5

GN 75% of net	GN 75% of net	GN 76% of net	GN 73% of net
SN 25% of net	SN 25% of net	SN 24% of net	SN 27% of net

Areas 6,7 & 8

Traditional fishing patterns to be maintained with an incidental catch of sockeye expected.

	Areas 9 & 10	Net fishing restricted to gillnets only.
CHUM	TROLL	
	Areas 1 to 10	Troll fisheries on this species should not escalate.
NET		
	Areas 1 to 10	Traditional fishing patterns to be continued.
CHINOOK	Areas 1 to 11	The commercial share of the Pacific Salmon treaty chinook ceiling (not including terminal exclusions) will be allocated 15.7% to net fisheries and 84.3% to troll (as in 1990).

WEEKLY NOTES - 1991 COMMERCIAL SALMON FISHERY

The pre-season fishing plan scheduled the first opening in Area 4 on July 1. We have opened on the last Sunday in June in the previous three years, to assess the Pinkut sockeye run, and to take advantage of the increasing chinook abundance. However, the early runs of sockeye on the Skeena, particularly Early Non-Babine stocks, have been very weak, and the last week of June is the peak week for these stocks. The last Sunday in June this year fell on the 30th, but an opening on Monday was scheduled to reduce overtime.

The North Coast Advisory Board made a number of recommendations for the Area 4 fishery at their meeting of May 28. The following recommendations were made:

1. Trollers be allowed into Area 4 during any special seine fishery, but they must enter with "clean" holds and be allowed retention of pinks only.
2. Tidal water sport fishery for coho be closed during the times that the coho conservation measures are affecting other user groups.
3. Minimum escapement for 1991 pinks be maintained, and over escapements be shared between catch and escapement target. This would allow increased catch and escapement. However, if an in-river sport fishery for pinks is established, the NCAB would withdraw support for this and demand all additional escapement.
4. Test fishery data be adjusted to reflect true escapements for sockeye and pinks. This will be reviewed by the NCAB in the fall.
5. Gillnet selectivity study should continue in 1991.
6. Further commitment shery data be adjusted to reflect true escapements for sockeye and pinks. This will be reviewed by the NCAB in the fall.
5. Gillnet selectivity study should continue in 1991.
6. Further commitment should be made to enhance coho and steelhead on the Skeena.
7. The commercial fleet be allocated a certain amount of steelhead.
8. Area licencing for gillnets should be considered.

Only the first recommendation can be addressed by the sub-district Fishery Officer. Management Biology, responding to item 5, introduced a weed-line study in Area 4. Item 4 was also done.

Item 1: During our first special seine fisheries this year, trolling was closed on the entire coast. After re-opening, the troll fleet was concentrating on Fraser River sockeye, so there was no interest in trolling in Area 4.

Item 2: It was put forward to the local sportfish advisory board to reduce the daily limit of coho in tidal waters from 4 to 2 during conservation closures. The local board forwarded this recommendation to the North Coast Sportfish Advisory Board during its annual meeting, but the recommendation was rejected.

Information for Management Meeting, June 27

Sockeye:

Late freshet conditions are holding fish from migrating up the river. Consequently, we may have a smaller escapement this week than we had last week, which is extremely unusual. It is best to assume these fish are holding in Area 4 rather than assuming a weak run.

Cumulative escapement so far is about 21,500, and our desired to date is over 61,000. Daily escapements are limping along at about 1000 per day, when we should be getting about 8,000 per day. Next week we want about 11,000/day.

This week will be the second peak week of the Early Non-Babine stock. In fish abundance, the Pinkut run will dominate, as next week is the peak of this run. Early Non-Babine stocks have been depressed in recent years.

Sockeye test index stands at 42.51, the best since 1989. Brood index was: 1986 - 14.55 1987 - 35.19.

Food fishing: Effort is down considerably this year, with the new TTC agreement. Here is a comparison of licences issued between 1991 and 1990:

	1990	1991
Week ending May 25	34	11
June 1	40	15
June 8	50	22
June 15	63	28
June 22	95	

Catch information is not as timely, as reports come in usually a week late. Catch information is also very hard to interpret, as the fishery is spread over most of the week, and effort is down.

Chinook:

Index stands at 73.22, which is the third highest on record (behind 1987 - 82.62 and 1988 - 86.11).

It is too early in the runs to consider other species in management decisions.

Expectation - Fishing should be very good, due to the river holding the fish out in the fishing areas. Expect a 12-hour average in the 40 range (similar to 1988, when we went two days). However, unless fish start moving up the river before the opening, we should be very hesitant about extending.

Recommend: Open one day in 4-1, -2, -3, -4, -5, -8, -9, -12, -13, -14, & -15. Outside areas 4-1, -2, -3, -13 may be closed if we extend to the second day, to prevent the high catch of a mix of fish of unknown origin.

July 01

As usual, a gear flight was made at the opening.

<u>Slough</u>	<u>River</u>	<u>Gap</u>	<u>4-12</u>	<u>4-9</u>	<u>N. Boundary</u>

Resources:

Petrel Rock	-	4-12
Kitimat II	-	Outside Areas
Kaien Isle	-	R/G/S
Zona G	-	North Porcher
Sundancer	-	North Boundary

July 02

Weather hampered fishing in most outside areas during the night. From morning hails it was apparent that fishing was slow in most areas, with outside Smith Island being the most productive area, having an average of 41 sockeye. The River was poor, as the poor test fish catches had indicated it would be. Since we need about 11,000 sockeye per day this week to make our escapement goals, and in the first two days we have averaged less than 2,000, recommend to close as scheduled to permit needed escapement. Recommendation accepted.

Area 3 extended for 24 hours to take advantage of a strong sockeye run to the Nass.

Fishing picked up during the day, and most of the fleet moved to Smith Island. Final average for the total area was 73 sockeye.

Information for management meeting - July 04

Sockeye:

CPUE

1991 - 73(351gn) 1990 - 23(452gn) 1989 - 41(643gn)

1988 - 82(549gn) 1987 - no fishery 1986 - no fishery
55(640gn)

This week will be the peak week of the Pinkut and Early Babine Tributaries. Pinkut fish will dominate.

Escapements are still slow in the Skeena. We will be far below our desired escapement this week. Next week we want about 17,000 per day. We are still averaging less than 2,000 per day at the present. Tides will be good for escapement in the first half of next week, becoming poor near the end of the week.

Sockeye test index stands at 69.13, the second worst since 1985. Average in the 80's was 171.12. Brood year index was:

1986 - 76.68 1987 - 95.82.

Chinook:

Index stands at 111.84, the lowest since 1985. Average in the 80's was 84.82.

It is too early in the runs to consider other species in management decisions.

Recommend: Open one day in 4-1, -2, -3, -4, -5, -8, -9, -12, -13, -14, & -15. Recommend opening Monday at 6PM due to overtime constraints, with the directive not to work on Sunday. Result: overtime ban was dropped for gear counts on Sundays. Recommendation accepted.

July 07

Gear count at opening:

<u>Slough</u>	<u>River</u>	<u>Gap</u>	<u>4-12</u>	<u>4-9</u>	<u>N. Boundary</u>
5	126	8	256	85	23

<u>H.B. Pass</u>	<u>Out. Stephens</u>	<u>Edye Pass</u>	<u>Oval Bay</u>
21	14	9	3

Total
550

Resources:

Petrel Rock - 4-12
Kitimat II - Outside Areas
Princeton I - R/G/S
Zona G - North Porcher
Sundancer - North Boundary
Kaien Isle - R/G/S and 4-12

July 08

Fishing was very good in the river, with other areas reasonable. Escapement is very high, with an escapement yesterday of over 28,000, while we only want to average about 17,000 per day this week. Indications that another high escapement will be recorded today. Recommend extend 24 hours. Recommendation accepted.

Fishing slowed down during the day, and fishing in 4-12 was particularly slow.

July 09

Fishing has slowed down considerably, with most areas reporting an average of around 35 for the night. However, escapement increased to close to 45,000 yesterday. It appears that we meat our escapement goals for the week, and possibly overescape. Recommend extending 24 hours. Recommendation accepted.

July 10

Fishing remains similar to yesterday. Escapement dropped to 22,000 yesterday, still well over our required daily. However, fishing effort and the large tides for the rest of the week will probably decrease escapement dramatically for the rest of the week. Indications from the first set by the test boat for today's escapement indicate a large drop. Our large escapement for the first three days of the week still make it a pretty good bet that we will overescape if we dont fish the fourth day. However, the run appears that it may be early, and if this is so, we could do with a bigger escapement this week (we need close to 27,000/day next week). A conservative management strategy would be to close tonight, and see what happens to the escapement. We also have the option of fishing on Saturday, which would be the fourth day this week, although that possibility would seem remote with the expected drop in escapement. A consensus was reached to close as scheduled.

Fishing remained slow in the inside areas, but increased to an average of near 150 sockeye for the outside areas, particularly outside Stephens Island. There was some fleet movement to outside areas.

Information for management meeting - July 12

Sockeye:

CPUE	Brood Years:	
1991 - 121(550gn)	1986 - 57(269gn)	1987 - 79(275gn)
80(526gn)		
77(520gn)		

INDEX	Brood Years:	
1991 - 245.48	1986 - 123.35	1987 - 197.31

The coming week will be the second peak week of the Pinkut and first peak week of the Fulton. It will also be the first peak week of Babine Lake stocks. All these runs have been in very good shape recently. Fulton fish should dominate.

Escapements have been very good this week, with the expected arrival of Pinkut fish. We will overescape this week, needing only 10,000 more in the next three days. Next week we want about 27,000 per day. Tides will be poor for escapement in the first half of next week, becoming good near the end of the week.

Catches in the outside areas (Outside Stephens, Hudsons Bay Pass) near the end of last opening were very good, indicating new fish moving into the area.

Pink

CPUE		
1991 - 2(550gn)	1989 - 4 (705gn)	1987 - 10(275gn)
3(526gn)	5 (655gn)	
4(520gn)	8 (601gn)	
	16(866gn)	

INDEX		
1991 - 0.21	1989 - 1.03	1987 - 0.23

Pink escapements or catch do not give a good indication of total stock size; however, extremely high or low escapement indices or catch would be of concern. No management action is required this early.

Chinook

Index stands at 145.20, the lowest since 1985. Average in the 80's was 119.23.

The chinook run into the Skeena peaks around the first week of July, and they are becoming less important in management decisions.

It is too early in the runs to consider other species in management

decisions.

Recommend: Open two days in 4-1, -2, -3, -4, -5, -8, -9, -12, -13, -14, & -15. Recommend opening Saturday at 6PM due to probable over escapement this week, the strength of the enhanced runs, and the strength we noted on the outside areas before the last closure.

Much discussion ensued, with the Fishery Officer recommending opening on Saturday, thus fishing the fourth day of the week, and the biologist recommending Sunday. The reasons for not opening Saturday that were given was a fear that escapements would drop dramatically with the big tides at the end of the week, and our harvest rate would climb to about 70% with a fourth day of fishing, as opposed to around 50% with only three days fishing. The Fishery Officer stated that without fishing Saturday, we would lose a day's fishing in the season which we could never recover, and we would also over escape by a large amount. In the end, a Sunday 6PM opening was decided upon, and we would open for two days.

July 14

Gear count at opening:

<u>Slough</u>	<u>River</u>	<u>Gap</u>	<u>4-12</u>	<u>4-9</u>	<u>N. Boundary</u>
9	196	8	276	76	47
<u>H.B. Pass</u>		<u>Out. Stephens</u>	<u>Edye Pass</u>		<u>Oval Bay</u>

<u>Total</u>					
753					

Resources:

Petrel Rock - 4-12
Kitimat II - Outside Areas
Princeton I - R/G/S
Zona G - North Porcher and 4-9
Sundancer - North Boundary
Kaien Isle - 4-12

First haul information indicated slow fishing in the river, which was expected due to the big tides.

July 15

Fishing has been slow in the River areas, with many fishermen moving between the River and 4-12 due to the big tides.

July 16

Recommend extending 24 hours due to the strength of catches and escapement. Recommendation accepted.

July 17

Recommend closing as scheduled. This has been three days fishing this week, and by closing now we have an opportunity to open on Saturday for the fourth day of the week, and this will maximize our catch. It appears likely that we will overescape both on sockeye and pinks this week. Recommendation accepted.

Additional help in getting hails today was received from the James Sinclair and the Area 3 charter vessel Salty Bear.

Information for management meeting - July 18

Sockeye:

CPUE	Brood Years:	
1991 - 104 (753gn)	1986 - 113 (388gn)	1987 - 175 (424gn)
93 (747gn)		
72 (774gn)		

INDEX	Brood Years:	
1991 - 415.86	1986 - 286.63	1987 - 352.95

As indicated, both catches and escapement are considerably better than both brood years.

The coming week will be the peak of the Babine Lake run, and the Late Non-Babine fish. Fulton fish should dominate in fish abundance.

We are slightly behind in our escapement this week, but this is not a problem due to the overlap of overescaping fish at the end of the prior week. Also, escapements should increase with the fishery closing.

Next week we want about 31,000 per day. Tides shouldn't be a factor next week.

Catches in the outside areas (Outside Stephens, Hudsons Bay Pass) near the end of last opening were very good, indicating new fish moving into the area.

Coho

SKEENA COHO IN-SEASON MANAGEMENT TARGETS

DATE	WEEKLY TARGET INDEX	CUMMULATIVE TARGET INDEX	ACTUAL WEEKLY INDEX	ACTUAL CUMMULATIVE INDEX
July 13	0.2	0.2	0	0
July 20	1.8	2.0		

Pink

CPUE

19(747gn)	43(565gn)	
22(774gn)	145(259gn)	

INDEX

1991 - 6.27	1989 - 10.87	1987 - 29.67
-------------	--------------	--------------

Pink catches and escapements are below the last couple of odd years. Indications are that pink escapement will improve dramatically with the increased river catch at the end of the fishery (31 average in the river on the last day).

Chum

Index stands at 0, compared to an 80's average of 0.64. Chum catches have been reasonably good on the outside of Area 4, with CPUE's in the 20's.

Chinook

Index stands at 180.18, the lowest since 1985. Average in the 80's was 147.12.

Chinook are no longer a management concern in the Skeena, as the run tapers off.

Recommend: Open three days in 4-1, -2, -3, -4, -5, -8, -9, -12, -13, -14, & -15. Recommend opening Saturday at 6PM due to probable overescapement this week, the strength of the enhanced runs, and the strength we noted on the outside areas before the last closure.

July 20

27	20	1		9	
<u>Total</u>					
762					

July 21

Fishing was good in the first 24 hours, with the highest sockeye catches along the North Boundary.

July 22

Weather kept most of the fishermen in for part of the second day. As a result catches were down considerably.

July 23

Escapement is still holding up well. Recommend extending another 24 hours to catch surplus sockeye. Recommendation accepted.

July 24

Poor fishing decreased our fleet size considerably. Many boats are running south, and many others are tied up in disgust. Since this is the fourth day fishing in a row, recommend close as scheduled. Recommendation accepted.

Information for management meeting - July 25

Sockeye:

CPUE	Brood Years:
1991 - 65(787gn)	1986 - 154(548gn) 1987 - 128(541gn) 381(72sn)
89(707gn)	105(523gn) 69(505gn) 215(56sn)
75(572gn)	108(566gn)

TOTAL CATCH TO DATE:

1991 - 653,680 1986 - 260,073 1987 - 239,715

1991 pre-season point projection was 750,000 catch.

INDEX	Brood Years:
1991 - 616.81	1986 - 491.02
	1987 - 596.41

Total catch and escapement are considerably better than both brood years, but CPUE is down considerably.

The coming week will be the peak of the Babine River run.

We are slightly behind in our escapement this week but expect the numbers to jump up as the fishery is now closed. Next week we want about 23,000 sockeye per day.

INDEX

1991 - 51.94	1989 - 58.68	1987 -143.83
--------------	--------------	--------------

Pink catches and escapements are below the last couple of odd years. Indications are that pink escapement will improve dramatically with the increased river catch at the end of the fishery (182 average in the river on the last day).

Chum

Index stands at 0, compared to an 80's average of 1.33. This is the lowest escapement at this time ever, and could begin to be of concern unless we start getting some chum at the test fishery soon.

Chinook

Chinook is no longer a management concern.

Index stands at 187.97, the lowest since 1985. Average in the 80's was 156.31.

Recommend: Open three days in 4-1, -2, -3, -4, -5, -8, -9, -12, -13, -14, & -15. Recommend opening Saturday at 6PM due to probable over escapement this week. Recommendation accepted.

July 27

Gear count at opening:

<u>Slough</u>	<u>River</u>	<u>Gap</u>	<u>4-12</u>	<u>4-9</u>	<u>N. Boundary</u>

0	1	1	2

Total

305

This is the lowest gear count of the year. Although the Kitimat II did not have much to do, he was kept on the outside to monitor any arrival of seines in the area, when it opens tonight at 6PM.

August 05

Only five seines fished the area in the first 24 hours. Catches were not impressive. However, the gillnets in the River are getting very good catches of both sockeye and pinks.

August 06

Due to the lack of coho showing up at the test fishery, recommend closing as scheduled. Also, we should re-open for a special non-retention seine fishery on Thursday, due to the large over escapement of pinks. Recommendation accepted. After discussion, a special seine fishery for 14 hours, 6AM to 8PM, on Thursday, August 08, was announced. There would be no retention of coho, chum, or sockeye, and the fishery would only be open in 4-12 and 4-15.

1991 - 958.62

Brood Years:

1986 - 922.15

1987 - 1017.36

Total catch is considerably better than both brood years.

For the remainder of the year, Babine River fish should predominate in the fishery.

Chum

Index stands at 2.54, compared to an 80's average of 16.36. Only 1975 was lower at this time.

Steelhead

Index is 11.87, compared to an 80's average of 61.63. The only worse year is 1957.

Recommend: Open two days in 4-1, -2, -3, -4, -5, -8, -9, -12, -13, -14, & -15. Open Sunday at 6PM. Seines open two days, starting Sunday at 6PM, in 4-1, -2, -3, -4, -5, -8, -9, -13 and -14. Recommendation accepted.

Meanwhile, our special seine fishery opened this morning at 0600h. Last night, BC Packers requested that boats be allowed into the area with fish aboard, since Area 3 had only closed 12 hours previously, and they would not be able to clean up all the boats that wanted to participate. Since we had only allowed 12 hours, to be fair we said this would be alright. In retrospect, this was a poor decision, for we received a lot of complaints that the fishery would now be unenforceable. In future, at least 24 hours should be

allowed between a seine closure and a special opening.

The announcement at the pre-opening time checks was worded like this:

"Attention the seine fleet in Area 4, this is the Fisheries Patrol Vessel Petrel Rock. The time now is _____. At 6 AM sub-areas 4-12 and 4-15 will open to seine fishing for pink, sockeye, and chinook salmon. This fishery is not open for coho, chum, or steelhead. Sorting must be done and these species must be returned to the water with the least possible harm. If appropriate sorting is not being carried out by all vessels, the fishery will be closed on short notice.

If I am forced to close the fishery for this reason, the vessels not complying will be named on the air and in a Notice to Industry."

Despite the request that boats be empty of fish, and due to the fact that we requested only, and did not require, many boats showed up with fish on board. It is evident that a mere request is not good enough.

There were 46 seines that participated today, and all boats observed were sorting their fish. Handling of fish was erratic, with some vessels doing a careful job, others not so good. For instance, one vessel observed pulled a bag of about 500 fish through the stern rollers, squeezing the bag to about half its diameter. Weather came up during the day, and many boats stopped fishing. Even so, the average catch was 5800 pinks.

There seemed to be very few discards, with between 3 and 4 pieces being returned to the water on some sets, and on other larger sets no fish at all. Two large sets were monitored closely, with every fish observed from sets of about 1500 pieces, and no incidental species were in them.

Since the sorting appeared to be going well, and weather was hampering a good assessment of the fishery, it was recommended to go another day. During a management meeting, it was decided that an eight hour fishery, from 8AM to 4PM, would be conducted tomorrow.

August 09

Only 26 seines participated on this second day of the special fishery, with some boats heading south for sockeye fishing. Catches were good, with an average of 5665 pinks for the 8 hours. Again, boats seemed to be sorting very well, and most fish returned to the water appeared to be quite healthy.

August 11

Fishing opened this evening for gillnets and seines.

Gear count at opening:

<u>Slough</u>	<u>River</u>	<u>Gap</u>	<u>4-12</u>	<u>4-9</u>	<u>N. Boundary</u>
18	79	9	55	26-8sn	36-2sn

<u>H.B. Pass</u>	<u>Out. Stephens</u>	<u>Edye Pass</u>	<u>Oval Bay</u>
0	1	0	2

<u>Total</u>
226gn - 10sn

August 12

Thick fog hampered haul gathering this morning. However, fishing was good, and we averaged 102 sockeye with gillnets, 4779 sockeye with seines, which is very high for this time of year. Pink fishing was also very good.

August 13

Fishing is still good this morning. However, since we are in our coho conservation mode, recommend closing as scheduled after the two days. Coho escapement has increased somewhat, and there is now 5 worse years, compared to 2 worse years last week. However, we are still way behind schedule. Recommend special seine fishery starting 24 hours after Areas 3 and 5 close. Recommendation accepted. The special seine fishery is scheduled for 6PM August 14 for 24 hours.

When this was announced on the grounds, there was strong opposition from the gillnet fleet. Boats threatened to keep fishing when it closed at 6PM. An office occupation was also threatened. The gillnets basically wanted equal time with the seines. The Ministry of Environment phoned and was strongly against the fishery, saying that we had no idea of survival of released fish. Metlakatla Band phoned and wanted a food fishery, with one member stating that he would use it to catch fish to sell the next opening.

With all the opposition, and the threat of an illegal fishery this evening, help was obtained in the form of the North Rock and three Fishery Officers from the enforcement unit. As it turned out, a protest fishery did not materialize, and there was no problem with the closure.

August 14

This morning about 15 irate gillnetters showed up at the office, and we talked for about an hour and a half. No attempt was made to get into the office, although we had taken the precaution of locking doors. The points made were that the gillnetters wanted equal time with the seines. It was explained to them that this was all in the pre-season plan, had been run by all the advisors, and had been agreed upon. It was also pointed out that we had been trying to get them to go to 4 3/4 inch mesh for years, which they had never agreed to, so this was the result.

The fishery opened at 6PM, with 60 seines in attendance. Fishing was reasonable. However, it was noted that some seines fished right in front of Chismore, Spiller, Humpback, and Oona River. The boundaries that had been in place in previous years were not in place this year for two reasons. One, the brood year had seen good escapements to most of these systems, and there should be some surplus from that. Second, it is early yet, and the boundaries may have been put in place a week too early in previous years. It was also thought that boats would not fish in Chismore Pass. In retrospect, maybe the boundaries would have been a good idea to keep them away from these creeks, since the surplus we want to harvest is Skeena pinks.

August 15

Sorting again went well. The fish observed being returned to the water all looked very healthy. The beavertail stern ramp in most seines provides a very gentle way of lifting the bag of fish from the water, and was probably the best way. The largest bags seemed to have no discards whatsoever, while smaller bags of 20 to 50 had most. Again, a large set of 2500 fish was monitored thoroughly, with every fish observed, and there were no incidentals.

Unloading was monitored in Prince Rupert, and the boats were very clean. Five boats were monitored at random, and discussions were conducted with graders. The fishery seemed very clean.

Later, on the morning of August 16, one charge was laid on the Western Hunter, and 9 coho, 2 chum, and 1 steelhead were seized.

168gn

Sundancer has now finished, working his last day on August 15. Zona G moved to North Boundary, while the Kitimat II is scheduled to come out tomorrow for the opening of the seine fishery.

17 gn were checked in the River for first set information, and they averaged 14 sockeye and 36 pinks.

August 19

Sockeye catches still fairly good, with an average of 62. Pinks also are holding up.

August 20

Sockeye and pink still good. Only three seines showed up. The strength of the target species indicates we could go another day. However, there are about 60 seines in Areas 3 and 5, and Area 3 wants to close. We do not want that many seines working in Area 4, due to the weakness on non-target species, particularly chum, steelhead, and coho. Therefore, recommend extend one day for gillnet only, close to seines. Areas 3 and 5 did this as well. Recommendation accepted.

Information for management meeting - August 22

TOTAL CATCH TO DATE:

1991 - 2,041,090 1989 - 1,056,502 1987 - 2,020,730

This is a new record catch for Area 4.

Pre-season expectations were for a catch of 2-3 million.

Highest catch on record: 1987 - 2,020,730 hailed.

Sockeye

Recommend: Due to the low ratio of target species to incidentals, we should not open again. For now, we should announce we are closed until further notice. Recommendation accepted.

Management Meeting - September 5

No surprises since last meeting. Coastal escapement monitoring has been hampered by heavy rains. It is felt that if an opening were held at this late time, the ratio of coho, chum, and steelhead to pinks would be unacceptable. Therefore, recommend close until further notice, with a note that further fishing opportunities are unlikely. Recommendation accepted.

Management Meeting - September 12

Situation since last meeting has not changed, except that coastal streams have cleared up somewhat. Escapements to these systems are about average for an odd year. It is felt that there will be no further opportunities to fish in Area 4 this year, so recommend close for the balance of the season. Recommendation accepted.

RECORD OF MANAGEMENT STRATEGIES (RMS) - SALMON

1991 POST SEASON SUMMARY AND ASSESSMENT

AREA 4 - SKEENA SUB-DISTRICT

1. PRE-SEASON EXPECTATIONS:

	Sockeye	Coho	Pink	Chum	Chinook
Expected Return	2100000	*	5800000	15000	*
Target Esc.	1000000	216375	1000000	50000	97710
Surplus	1100000	*	4800000	0	*

*Expectations are not calculated for coho and chinook. However, for 1991 a poor return of coho was expected in the upper portion of the Skeena River (above Terrace) and average to good in the lower reaches and coastal systems. This has been the trend to coho escapements in recent years. Chinook returns were expected to be similar to recent years with good escapements.

-In the total Area summary above, surpluses and deficits mask one another. These figures were not calculated from individual stocks.

-Target escapement for pink is management target which is currently being changed. The NCAB has agreed to retain a minimum target escapement of 1,000,000, with returns over the minimum to be shared between catch and escapement on a sliding scale. This system was in place in 1991 and will be reviewed during the winter of 1991/1992. The stream-by-stream target escapement for pink is 1,907,695.

-The target escapements for sockeye and chum are management targets. Actual stream-by-stream target escapements are: sockeye - 1,022,385 chum - 54,900.

Closed For The Balance Of The Season September 12/91

Total Days Fishing	GN - 25 days	SN - 6.9 days
Total Accum. Effort	10921 days	178 days

3. PROPOSED GENERAL FISHING PLAN:

Sockeye- An average return is expected totalling 2.1 million of which 200,000 will be harvested in Areas 3 and 5, and 150,000 in the native fishery. Maximum of 4 days net fishing per week prior to week ending August 3. Maximum mesh restriction 137mm.

Coho- Commencing August 4, fisheries will be designed to conserve coho and minimize surplus escapements of sockeye and pinks. Fishing plans include non-retention of coho and steelhead by seines. Trolling restricted to net fishing times and areas.

Pink- A return of 5.8 million is expected. This is above average for recent years.

Chum- No surplus expected. Chum catch is incidental during pink and sockeye fisheries.

Chinook- No directed fishery in 1991, with good escapements expected based on recent years' returns. Catches of chinook will be incidental to other fisheries.

4. COMMERCIAL NET FISHERY:

SOCKEYE

Sockeye fishing began July 1, for one day, as per expectations. Catches were fair, but escapement was poor, so the fishery closed as scheduled after one day. The second week, catches and escapements indicated increasing strength in the run, and allowed for a three day fishery. Thereafter, four days per week were fished for the remainder of the sockeye management phase of the season. The catch of 1,083,546 was slightly above our pre-season prediction of a catch between 500,000 and 1,000,000. This catch is 19% more than the 15 year average of 913,232 (1976-1990).

Allocation between seine and gillnet was set pre-season for sockeye at: gillnet 75%, seine 25%. Actual split this year was: gillnet 60.6%; seine 39.4%.

Fishing effort and days comparison:

	Days Fishing		Boat Days	
	GN	SN	GN	SN
1991	25	6.9	10921	178
1976-1990 av	22.1	6.5	8643	285

COHO

Coho returns to the Skeena were expected to be poor, and the restrictions for all user groups (except tidal water sport fishers) went into effect as scheduled. The following restrictions were implemented:

- Native fishery:** No closures this year. As part of co-management, natives in Moricetown were given eight dipnets to use instead of gaffs, so they could release coho unharmed. This initiative seemed to go very well.
- Sport fishery:** Closure to retention of wild coho in the Skeena and trib all year above Terrace and until August 31 below Terrace. An adipose fin clipped fishery was allowed above Terrace.
- Gillnet:** Two days per week maximum during the weeks of August 4-10 and 11-17.
- Seine:** Special seine fisheries in weeks of August 4-10 and 11-17, with non-retention of coho, steelhead, and chum. These fisheries confined to 4-12 and 4-15. Fisheries lasted a total of 22 hours the first week and 24 hours the second week.
- Troll:** Closure in northern Hecate Strait (Areas 102-1 and 104 north of 54 degrees) from 2359h August 6 to 0001h August 21.

Minimum escapement requirements, which are defined as an index of 66 at the Tyee test fishery by August 24, were not met. The index on August 24 stood at 55.36.

SKEENA COHO IN-SEASON MANAGEMENT TARGETS

	weekly target	cumulative target	actual weekly	actual cumulative
July 13	.2	.2	0	0
July 20	1.8	2.0	0.68	0.68
July 27	4.4	6.4	3.38	4.06
August 03	13.1	19.5	2.91	6.97
August 10	17.6	37.1	15.24	22.21
August 17	17.0	54.1	15.05	37.26
August 24	11.9	66.0	18.10	55.36
August 31			27.78	83.14

PINK

Management switched to pink salmon beginning on August 04. As expected, the run was very strong, and record catches were recorded in Areas 3 and 4. The total catch in Area 4 of 2,271,809 beat the previous record catch of 2,020,730 set in 1987, and was within our pre-season predicted catch range of 2 to 3 million. Allocation in 1991 for pink was set pre-season at: gillnet 28%, seine 72%. Actual split was gillnet 13.4%; seine 86.6%.

CHUM

As expected, there was no surplus of chum salmon this year. Our catch of 35,869 was considerably below the 15 year average of 52,645. Due to the weakness of catch and escapement, our special seine fishery included the non-retention of chum.

CHINOOK

The chinook catch this year of 13,554 was above the 15 year average of 9,582, but considerably below the high 1988 catch of 21,331.

5. SPORT FISHERY:

Tidal:

Catch:	Sockeye	Coho	Pink	Chum	Chinook
1991	35	1000	3500	10	2500
1990	200	5000	3000	25	2600
1989	250	3500	5000	10	2500
1988	150	1500	6000	25	4200
1987	100	2500	7000	0	3750
1986	50	4000	5000	0	3200
1985	40	2500	3500	0	2500

The catch estimates shown above are estimates calculated by Fishery Officers. In 1991, a sport fish creel census was conducted during the months of July and August. The estimate from this census was nearly identical to the Fishery Officer estimate. The chinook estimate from the census was much lower due to the fact that when they started, on July 1, the major part of the chinook run was over.

This year most of the sockeye catch occurred near the entrance to Shawatlans. Also, a small sockeye fishery takes place near Smith and Kennedy Islands.

Coho catches were down in 1991 compared to recent years. Abundance of coho and weather conditions were poor this year.

Pink catches were similar to last year.

Chinook catch was very similar to last year. This year, chinook catch in tidal water was again restricted to two per day.

Catches were calculated from a limited number of checks on the water by Fishery Officers and charter patrolmen.

Non-tidal:

Catch 1991	Coho	Chinook
Area 4/W.F.	220	15
Terrace	3500	2500
Hazelton	0	750
Smithers	10	1175
Total	3730	4440

Average catch - 1985-1990 (6 year average)

	Coho	Chinook
Area 4/W.F.	330	65
Terrace	1792	1750
Hazelton	250	283
Smithers	87	1073
Total	2459	3171

The catch from each of the four areas is calculated by the Fishery Officers responsible, with the Area 4/W.F. being a combination of two sub-districts.

Chinook catches in Area 4 take place in the Ecstall River. This year, all the fish were caught in the two weeks immediately prior to the August 01 closure for large chinook. A guardian was in place from July 15 to August 18 this year.

Only adipose clipped coho were allowed above Terrace, thus the recorded catch of only ten fish.

A fishery this year was held on pink and sockeye in fresh water, for the first time in recent memory. Unfortunately, funds did not allow Fishery Officers to keep track of this fishery, so an unknown amount of these fish were caught in Terrace and Smithers Sub-Districts. In Hazelton Sub-District, and estimated 90 sockeye and 1900 pinks were caught.

6. INDIAN FOOD FISHERY:

Total Indian Food Fish Catch On All The Skeena River

1991 S/D	Sockeye	Coho	Pink	Chum	Chinook	Steelhead
Area 4	13126	14	244	15	1828	45
Terrace	9293	216	2945	10	1339	577
Hazelton	88000	2200	30000	500	5500	unk
Smithers	28650	2516	5000	0	6200	402
TOTAL	139069	4946	38189	525	14867	1024
1976-1990 average:						
Total	143314	10418	33511	1089	11515	5397

Estimates of catch are calculated by the S/D Fishery Officer in each of the areas mentioned above. See attached summary of Area 4 tidal Indian Food Fishery.

Sockeye and pink catches are very similar to the fifteen year average.

Coho and chum catches are lower than the fifteen year average, which is mainly due to the decreased abundance of these fish. Due to the Sparrow ruling by the Supreme Court of Canada, there were no closures this year for coho. The Moricetown Band was encouraged to fish with dip-nets during the closure, with non-retention of coho. Eight dipnets were purchased for the band to further awareness of the coho problem.

Chinook catch was above average, and reflects the general trend of increasing abundance of these fish.

Steelhead abundance in the Skeena this year was very low, and the TFF catch reflects this.

7. WEEKLY NET CATCH:

(attached)

8. ESCAPEMENTS:

	Sockeye	Coho	Pink	Chum	Chinook
1991	1,233,710	59,909	4,782,047	3,183	52,753
1976-1990 av.	1,052,435	36,222	1,660,082	18,280	37,588

Sockeye

TEST INDEX

Comparisons are standardized to August 24, since in some years this was the last day of the test fishery. Index at that time was 1173.75, compared to the 15 year average index of 1498.22.

ENUMERATION

Total escapement (1,233,710) is above the 15 year average (1,052,435), the management target (1,000,000), and the stream by stream target (1,022,385). Babine Sub-Area again overescaped (target 867,350; 1991 1,156,750). However, all the other sub-areas underescaped by substantial margins.

Key Stream	Target Esc.	Current Year Esc.
Babine River	200000	355000
Club Creeks	6000	7500
Fulton River& Channels	220000	181487
Morrison Creek	20000	13000
Pierre Creek	25000	25000
Pinkut Creek& Channel	130000	393512
Shawatlan Creek	5000	1700
Southend Creek	15000	6500
Williams Creek	15000	2700

Coho

TEST INDEX

Index was 55.36, compared to 15 year average of 62.38. Index was lowest since 1988.

ENUMERATION

Coho escapement information for the Skeena River system and coastal area is considered poor, as weather and water conditions restrict the accuracy of enumeration, and thus only a limited amount of escapement monitoring is conducted. Toboggan Creek (an enhanced stock) is the only key stream to exceed its escapement this year.

Key Stream	Target Esc.	Current Year Esc.
Babine River	10000	4904
Clearwater Creek	1000	350
Diana Creek	3500	200
Dry Creek	500	300
Kispiox River	7500	1400
Kitwanga River	2000	500
Nangeese River	750	N.I.
Toboggan Creek	2000	3200

Pink

TEST INDEX

Index was 1774.96, compared to an odd year average of 1104.22 over the last 15 years. During this time, only the brood year of 1989 had a higher index.

ENUMERATION

Total Pink escapement (4,782,047) is the largest escapement on record. Over-escapements occurred on most streams, and in particular on most key streams.

Key Stream	Target Esc.	Current Year Esc.
Babine River	150000	236021
Kispiox River	200000	250000
Kitwanga River	250000	250000
La Hou Creek	25000	25000
Lakelse River	500000	1800000
Moore Cove Creek	75000	45000

Chum

TEST INDEX

The test index indicated low returns of chum all year, and we ended with an index of 17.07, compared to a 15 year average of 52.22. This is the lowest since 1985, and the second lowest in the last 15 years.

ENUMERATION

Total chum escapements, at 3,183, were significantly lower than the target of 54,952, and were well below the fifteen year average escapement of 18,280. This is the lowest count since 1983.

Key Stream	Target Esc.	Current Year Esc.
Andeside Creek	500	N.I.
Ecstall River	20000	N.I.
Kispiox River	5000	N.I.
Kitwanga River	5000	1500

Chinook

TEST INDEX

Our index this year of 201.98 is well above the 15 year average of 155.63, but is still the lowest since 1985. The jack index of 10.39 was below the 15 year average of 32.34, and the lowest since 1976.

ENUMERATION

Total chinook escapement is 52,753, which is above the 15 year average of 37,588. However, this is the lowest since 1984. The target escapement is 97,710.

Key Stream	Target Esc.	Current Year Esc.
Babine River	7000	1043
Bear River	12500	5500
Cedar River	3000	175
Johnston Creek	3500	150
Kispiox River	7500	3500
Kitsumkalum River	15000	9200
Morice River	15000	25500

Steelhead

TEST INDEX

Test index of 30.05 was below the 15 year average of 102.22. This is the worst year during the last 15 years.

9. Current Year Escapement By Stream:

APPENDIX III

WEEKLY RECORD OF AREA 4 NATIVE HARVEST

INDIAN FOOD FISHERY - 1991

In 1991, the Indian Food Fishery in Area 4 changed significantly. A fisheries agreement was reached with the Tsimshian Tribal Council, and in the spring they took over the issue of all food fish licencing. Licencing was restricted to Tsimshian boats only. This resulted in significantly reduced fishing pressure. Licences were issued from the Tsimshian Tribal Council office, from Port Simpson band office, and from Metlakatla band office for Area 4. Catch stats at first were spotty. The TTC made it a policy that the next licence would only be issued to a fisherman if the previous licence's catch was reported.

The first week of the new regime began on the week ending May 25.

Week ending May 25

MEMORANDUM
NOTE DE SERVICE

TO | Les Jantz
 | Skeena/Nass
 | Biologist

FROM | Mike Jakubowski
 | Babine Fence Technician

Security Classification

Unclassified

Date

November 23 1991

SUBJECT: 1991 Babine River Counting Fence Adult Program.

In 1991 the Babine River Counting Fence was installed and made operational on July 7. Enumeration ended on the morning of October 20 when the traps were removed allowing the fish free passage. A data manuscript due out early in the new year will provide a more detailed account of this years program.

The species escapements were as follows:

1) Sockeye 1,592,367 Large 1,176,318

Jack 416,049

2) Chinook 1,213 Large 1,043

Jack 170

3) Pink 232,021

4) Coho 4,904

5) Chum 0

6) Steelhead 83

DEC 6 1991

DANIEL CTS

DEPARTMENT OF FISHERIES AND Oceans
RUPERT B.C.

As in years past a commercial harvest of Jack Sockeye was carried out at the fence by members of the Fort Babine village. In 1991 a total of 169,797 Jacks were taken. This number is included in the fence count.

Due to the P.S.A.C strike in 1991 population estimates from a tag/recovery program were not available for the Lower Babine River. A tagging program was completed on the Upper Babine at a later than usual date. Population estimates are as follows;

Lower Babine River (by visual count.)

Nilkitkwa Lake to the counting fence = 5,000

Upper Babine River

Fort Babine to Nilkitkwa Lake = 300,000

POTENTIAL BABINE EGG DEPOSITION.

Total number of large sockeye = 1,176,318

Calculated # of females = 741,080

Number taken in Native Food Fishery = 17,500

Number of females taken in Native Food Fishery = 11,025

Number taken in Elder Fishery = 2,100

Number of females taken in Elder Fishery = 1,323

Number of females taken in all = 12,348

Number of females left for spawning = 728,732

Average Fork Length = 53.39

Potential Egg Deposition = 2,015,672,712 *

* (number of females x fecundity **)

** fecundity = (((average fork length) x 82.3) - 1628)
